Appendix 6 – Tracking system

ONI® tracking system

1. General provisions

During the rally, all competition vehicles must be equipped with monitoring ONI® system. The ONI® monitoring equipment is the property of the Autoclub of the Czech Republic and the competitors must loaned to the competitors for a one-time fee of 160 CZK per unit (included in the entry deposit), or 530 CZK for the whole set (paid by the competitor), if he has not purchased the basic installation kit earlier. The price of the permanent installation set is 1320 CZK.

Any destruction, non-return or damage to the equipment must be paid by the competitor to the administrator according to the approved price list. Failure to return the unit immediately after the competition will result in the crew will be fined 3000 CZK. Until the unit is returned, the crew will not be allowed to start the next competition.

Return contact: +420 722 734 127

2. Distribution of the ONI® tracking system

ONI® tracking system contains following parts:

- tracking unit with display
- tracking unit holder
- power supply cable
- combined antenna roof
- control panel containing:
 - OK button to cancel the alarm / confirm red flag
 - SOS switch for calling emergency

ONI® tracking system will be installed to every rally car before each event. Detailed information will be published no later than during roadbook issuing.

After arrival to the scrutineering, device administrator will install the tracking unit, antenna and control panel.

Antenna and power supply cables can be purchased by the crew for personal ownership.

At the end of the rally or after retirement, the tracking unit or complete tracking system must be returned to the device administrator. The collection of units usually takes place in the service area before the rally finish, in front of the finish ramp or in a closed car park.

3. Installation of the unit in the car

3.1 To fit the tracking unit with display, antenna and control panel, it is necessary for the competitor to follow exactly the Installation guide, to keep the unit in good condition and to protect it against damage and fouling (especially the connectors) during the time.

3.2 Foreign and one time rally participants will receive a rental version of the set equipped with magnetic roof antenna.

3.3 Control panel with OK button and SOS switch is in one box for which the competitor has to choose a suitable place for fitting within the reach of both crew members. It is obliged to prepare everything for its installation prior to the scrutineering.

4. The unit operation during rally

To operate the unit, the crews have to meet all instructions as mentioned in the User's guide.

Operation during events on SS:

- **Accident (crash detection)**
 - The unit evaluates the situation and sends info about accident to rally control. Crew cannot affect this message.
 - The display shows message: **Are you OK?** Confirm.
 - 10 s after this question, the siren wails for next 15 s
 - If the crew pushes **OK** button, this information is sent to rally control and information about accident is not sent to the unit of following cars in the stage.
- **Stop in SS**
 - When the car stops in SS, it is counted as an obstacle. Unit signals to the crew by sound siren and text, that they have stopped. This signal takes 15 s.
 - If the crew doesn't push OK, warning message is sent to the rally control and also to other cars, which are currently in the stage arriving to the obstacle.
 - With pushing the OK button the crew confirms that they are okay, on the display is shown message OK and information about obstacle is not sent to the unit of next cars in the stage.
- **Request for help**
 - Changing the switch is confirmed by SOS message on display, also the siren sounds.
 - The siren sound can be cancelled by pushing OK button.
- **Red flag**
 - When the rally control hangs out the red flag, the display shows big message RED FLAG (with red

background) and the siren sounds.

- Crew has obligation to confirm receiving the red flag by pushing the OK button and to reduce the speed according to the sporting regulations.
- The siren sound can be cancelled by pushing OK button.
- The red flag on display can be cancelled only by rally control.

5. Speed checking during reconnaissance

During reconnaissance the crew is obliged to follow traffic rules of the Czech Republic. Not respecting this rule, especially exceeding the speed limits, will be monitored via ONI® tracking system. This checking doesn't exclude other checks, i.e. police controls according to their standard procedures.

ONI® tracking system for reconnaissance

Tracking system is checking the speed in every moment during the reconnaissance.

Every crew will pick up the ONI® recce tracking unit together with roadbook. Installation of the unit and its using during reconnaissance is obligatory for all crews during the whole schedule of reconnaissance according to the art. 3 Reconnaissance schedule. For speed checking during the reconnaissance, NCL 21 units are used.

NCL21 unit is started during roadbook issuing before starting of reconnaissance. For whole reconnaissance the unit is working on its own battery. It is not necessary to plug the unit to any power supply.

It is possible to place the unit on metal surfaces - magnets are implemented in the unit.

Not using the unit in a rally car during reconnaissance will be fined.

Every attempt to falsify, manipulate or infringe the unit for reconnaissance or any device, which will make impossible to collect data because of external interference will be reported to the stewards who can penalize the crew up to refusing the start.

Decision regarding seriousness of the offence and its repeating is in Clerk of the Course's authority. For exceeding the speed limit, sanctions can be given according to supplementary regulations or championship regulations.
