Environmental Plan

Dear Participants, Spectators, and Friends,

It is my great honour and pleasure to welcome you to the 23rd edition of the HunGarian Baja.

Over the years, the HunGarian Baja has become a truly special event in Central Europe, bringing together challenging competition, passion for motorsport, and, above all, an exceptional community.

This year, we are facing unexpected circumstances. Due to the severe wildfire affecting the region, we have had to adapt our plans and delay our event and also move on from our beloved Várpalota, relocating the Rally Headquarters to Tapolca.
This is a significant change, but one we make with responsibility and respect. The safety of our competitors, officials, volunteers, spectators, and the protection of the environment must always come first.
At the same time, this challenge reminds us of what makes the HunGarian Baja community so special: our ability to stand together, adapt to changing circumstances, and keep moving forward.

Respect for nature and environmental responsibility remain important values for us. They guide not only the way we organize our event, but also how we look toward the future.

I would like to express my sincere gratitude to Várpalota for its support and for being an important part of the HunGarian Baja story, and to everyone who has worked tirelessly to make this year's rally possible despite the exceptional circumstances.

We are equally grateful to Tapolca for welcoming us, allowing us to continue the 23rd HunGarian Baja and open a new chapter in the history of our event.
Thank you to all our competitors, partners, officials, volunteers, supporters, and fans for your understanding, flexibility, and continued commitment.
Our location may have changed, but the spirit, passion, and determination of the HunGarian Baja remain stronger than ever.

We look forward to welcoming you to Tapolca and sharing another memorable HunGarian Baja together.

Warm regards,
Zoltán Garamvölgyi

EVENT DETAILS

Name	Hungarian Baja 2026
Edition	23rd Edition
Date	2026.11.12. -14.
FIM / FIA	FIM Baja Word Cup. Hungarian C.C. Championship
Organizer	Garilla Racing Kft.
HQ	Tapolca (Hungary)

RACE LOCATION:

The competition will be held in the training area of the Hungarian Armed Forces, which is still active today, which already housed the artillery shooting school in 1905 and the Royal Hungarian Armed Forces Training Area Command in 1913. The infantry shooting range was established in 1968.
It is still an active training area that hosts NATO military exercises and other military activities.

Furthermore, in the Transdanubian Central Mountains, where we pass through the most beautiful parts of the Northern and Southern Bakony.
Millions of years ago, the sea was still raging in this area, at the bottom of which sedimentary rock, mainly limestone, was formed. The area became prominent later on. The prominent parts are separated from each other by spacious pools and sunken ditches.

HQ – Price Giving ceremony:

Tamasi Áron Cultural Center -Tapolca
Tapolca's community cultural centre: a home for theatrical performances, concerts, and exhibitions, as well as a hub for local clubs, groups, and amateur artistic communities. The cultural center offers rentable rooms including small club rooms, a dance/ballet room, an auditorium, a conference hall, and a theater hall as well.

WASTE MANAGEMENT

Waste is one of the main impacts of the event, this is generated both by its own organization and by the attending public.

More than 50 Waste collection points for the public will be installed in all spectator concentration areas. And the waste collection will be carried out at the end of the day, with surveillance brigades.
If they are filled before the end of the day, they will be removed and replaced by other empty ones.
Once the event is over, the cleaning staff will carry out a general review of all the facilities and their surroundings, removing any type of residue they may find.
The person in charge of removing the waste from the site will be the municipal cleaning and garbage collection company, and they will be in charge of treating it.

On the SS the area will be separated to 4 Sector chiefs. They are in charge to ensure that the waste is collected at the end of the day and all tapes, bandage and signage are collected at the end of the event.
A specific waste collection points will be established within the paddock, such as:

- **Provision of waste bins:** We will place an adequate number of waste bins and recycling stations throughout the event area.
- **Waste collection:** Waste will be regularly collected and disposed of responsibly.
- **Prohibition** of spilling any type of liquid on the ground.
- **Mandatory use** of **ecological mats** whenever any type of work is carried out on competing vehicles.

Would like to highlight to the competitors, guests and spectators that start 1st January 2024 Hungary has a new beverage deposit regulation.
The new regulation will only apply to beverage products that are ready to drink or are concentrates, and their packaging is made of plastic, metal or glass, and their capacity is between 0.1 and 3 liters. You have to pay additional 50HUF on top of the price, however you can gain back this fee by returning these bottles to the collection points.

These locations are: Search for the above signs at the major Grocery stores in the City.

Energy and Water MANAGEMENT

For the HQ the energy and water consumption costs are taken over by the City government. Also installed a small solar power plant and smart measurement points on the roof of the rally headquarter.
Tap water is qualified for drinking beside that going to use waterbottles that are recyclable and can be returned for re-use.
Car washing is only allowed in the designated washing bay only.
The headquarter have parshly integrated a lightsystem what operates with LED based motion sensors to limit the electricity usage in the main rooms.
For the opening and closing ceremony an advantage system going to be used with reduced electricity usage.

Ground and Water Pollution

The Environmental matt is compulsory to use in the service area.
Car washing is only allowed in the designated washing bay reachable from Service Zone.
Critical waste container is established for Oil and other hazard items in the Service Zone and there are alternate deposit areas in the allowed gas stations in the City of Tapolca.
Operation exclusively on gravel / forest roads under permission of the Ministry of Defense, Forest Department, with full avoidance of protected areas (Natura 2000).

Transportation and Carbon MANAGEMENT

The transportation management is defining part of the environmental protection.
Most of the transports are managed over Vans and plan is developed to deliver the SS and other event equipment in the most efficiently with the less effort and cost effective.
Marshals are grouping together to limit the usage of cars reaching their working locations. Sector chiefs with their 4*4 wehicles are going to deliver and collect majority of the marshals for the hard-to-reach places.

Biodiversity and Heritage

One of the main objectives of the organization is to leave the minimum footprint possible in the environment after the end of the event.
We will take the following measures:

- No contributions of external materials have been made to the natural ones of the land in which the same layout is located.
- The coexistence of the track with the environment and the native bush and trees has been respected as far as possible, leaving all possible natural flora around the facilities, cleaning only the passageways strictly necessary for health care and the development of the circuit work.
- At the end of the event, the posters will be removed, the adjoining roads will be checked in case there is excess mud or stones from the event vehicles on them

for cleaning, and all possible garbage that those who have not respected the rules may have left will be collected.
- Road repair activities are planned and executed to ensure that the used gravel and forest roads are restored to its original state.

NOISE EMISSION

In a motorsport event, noise control can be a challenge. In order to optimize this aspect and make a responsible event, the following measures are applied:
- Random measurements of noise levels can be carried out at the Technical Control.
- The necessary sound tests will be carried out to minimize the maximum volume used during the opening and closing ceremony to align with the local sound and silence regulation. In this way, the impact on the fauna that inhabits the surroundings of the HQ will be minimized.
- The Service Park and the Park Fermé is established at the side of the City to minimize the noize emission for the City residents.

AIR QUALITY

In our event the two main concerns are the dust and the fire. Event take place in the middle of the summer in a designated military area with no rain fallen for weeks. Constantly checking the official weather forecast and the air quality index for the event location.
Additional warnings and awareness have been raised over social media for the competitors and the spectators to mitigate possible wildfire.
This is in compliance with the National Disaster Management Office's guidelines and inhibition.

AFTER EVENT ACTIVITIES

Road Maintenance and Restoration
Tons of gravel and sealing material will be used to level out road irregularities and potholes.
The adjoining roads will be checked in case there is excess mud or stones from the event vehicles on them for cleaning.

Trash Collection: We will collect and safely dispose of all trash, as well as any stakes, signs, and barriers placed throughout the event area.
Possible garbage that those who have not respected the rules may have left will be collected.

Cleaning: The posters, adverts, molinos will be removed from the adjoining roads.

Environment: The flowers, bushes ruined during the event in the citiy of Várpalota will be restored.

The Hungarian Baja 2026 is committed to minimizing its environmental footprint and promoting sustainable practices. Through careful planning, monitoring, and community engagement, we aim to host a successful event that respects and protects the natural environment of Várpalota.

Locations:

WASHING AREA

The washing area is located near to the Service Park.
Operates with 100 HUF and 200 HUF coins, but there is an automated coin exchange automat. It is open 24/7

> It is expressly forbidden to wash any vehicle or car part outside the areas defined by the organisation.

https://maps.app.goo.gl/PsBHaW1JMGbKyDPw7

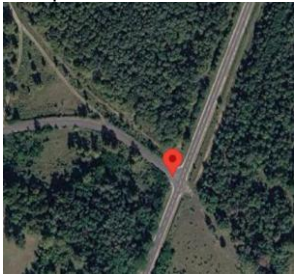

REFUELLING

Right hand side of the Ceremonial Start behind the blue servce zone a refuelling Zone has been established with a heavy Fire allocated for safety reasons.
Participants are reminded of the regulations regarding refueling their vehicles.
Remote refuelling zone will be set up for the National competitors, where using an environmental mat is mandatory and the refueling system has to go directly from the bottle to the tank, never into the air, that means that funnels cannot be used.

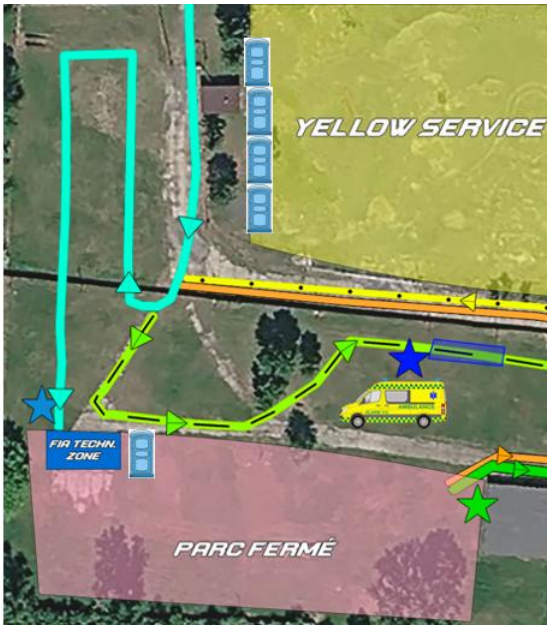

REMOTE REFUELING ZONE

The establishment and management of the Remote Refueling Zone are of major importance. The area will be at the Neutralization Zone for the National Competitors, where rescue teams will be deployed on-site to ensure adequate safety during refueling.
To support proper waste management, additional garbage bags and containers will be provided and emptied at the end of each day.

https://maps.app.goo.gl/md6zz7TWwiPtdXeEA

Parc Fermé

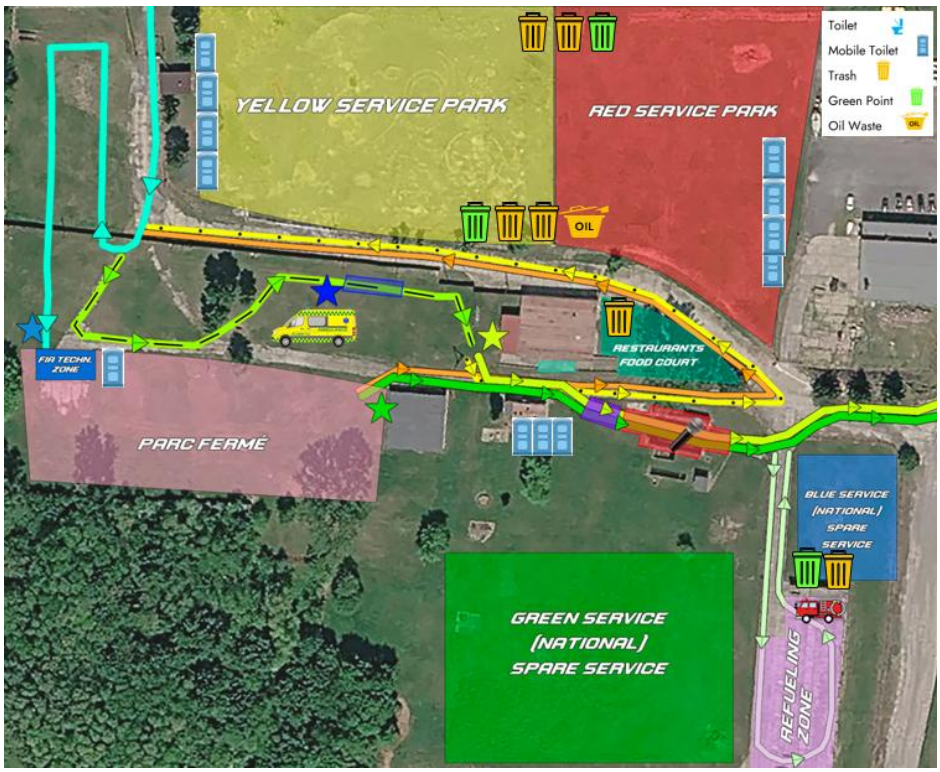

The Park fermé – what will be used as regruping during the event - located oposit side of the Yellow Service Park behind the service road.

Pedestrian traffic will be directed with arrows and tape. Fire extingwishers are positioned at the beginning and the end of the Park Fermé.

Paramedic and ambulance car will be also present for the competitors and for the visitors as well.

Service Zone

The ServicePark is separated to the FIA and National competitors. Additional waste disposal points and mobile toilets are installed all around the area.

Also Green points are installed in every service zones with oil absorber material, a vane and a broom to absorbe hazardous material like oil, fuel and additives.

Hazardous-Oil material bin is located between yellow and red service zone, but can also deposit hazardous material at the nearest Gas stations.

Additional ambulance with paramedic is also established in case ti is required for the competitors or the guests.

The speaker noise levels will be significant only during the the start and the finish of the stage. During the day, there will be live broadcasts and reports at normal volume.
