1.2. Titles for Which the Rally Counts

2026 Atlantic Rally Cup Road Surfaces

Transits are mostly paved roads. Stages roads vary from hard packed dirt/gravel to hard packed dirt with loose gravel on top. Rutting of the roads is not expected although there are a few sections of SS5/SS6 that may deteriorate.

1.3. Water Crossings & Alternate Routes

On SS5/SS6 there is a significant chance of multiple water crossings that have concrete cribbing (low water bridges or LWB) that can damage your car or bike. Slow down.

There is one crossing of a river where the roadbed crosses on a radius making the entry point hard to see. Do not stop in the river or at the entrance to the river.

If water levels are impassable, there will be an alternative route of the rally.
