

**2026 Oregon Trail Rally
Driver's Bulletin #6
16 May 2026**

1. Shadowbuck Splash Depth

Per reports from multiple stage captain scouting trips, the water feature on the Shadowbuck stage will be significantly deeper than the shallow puddles competitors experienced during recce.

Estimates reported the water feature to be about 2-3" deep and about 20-30 feet wide.

Photos have been attached for reference. Please incorporate this most updated information about the water feature into Sunday's navigation for racing.

We are continuing to monitor the water feature and will update via bulletin if situations change again.
