Service

P4

Op service P4 dient **een drukvlak** (metalen plaat, houten plank, ...) gebruikt te worden onder de krik omwille van kunststof grassdallen.

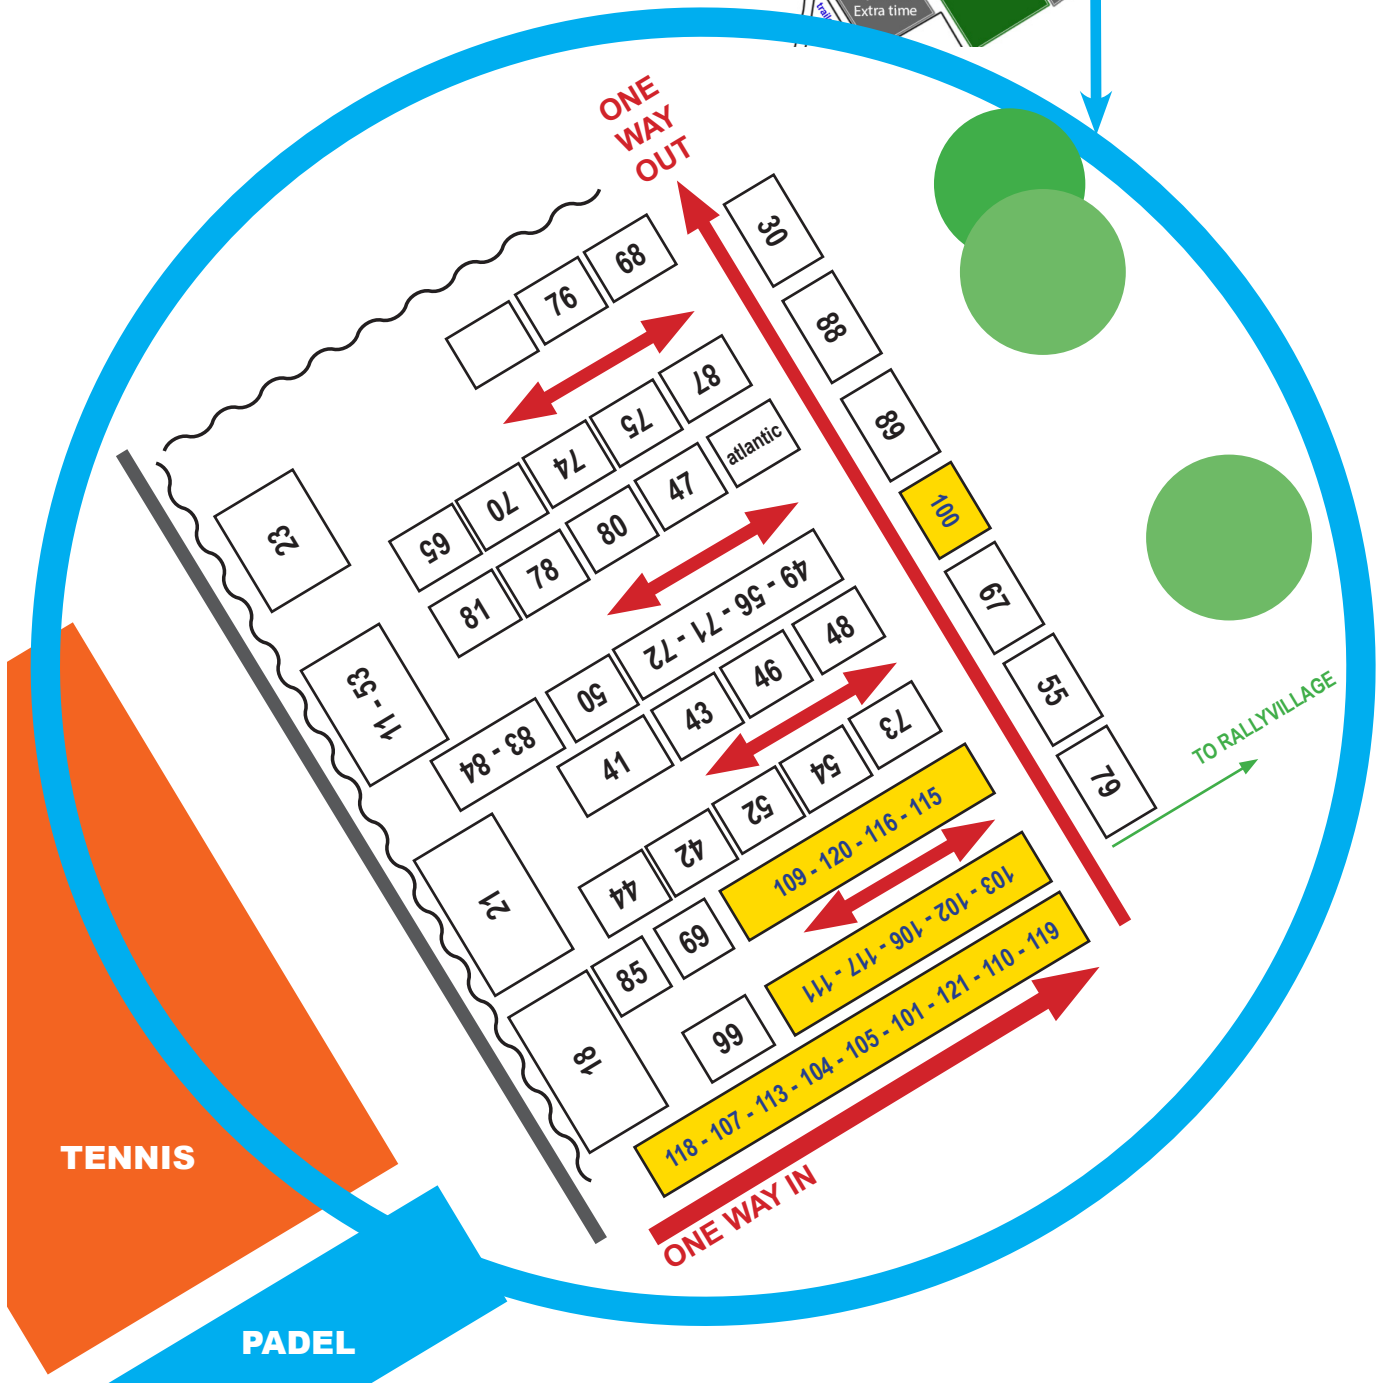

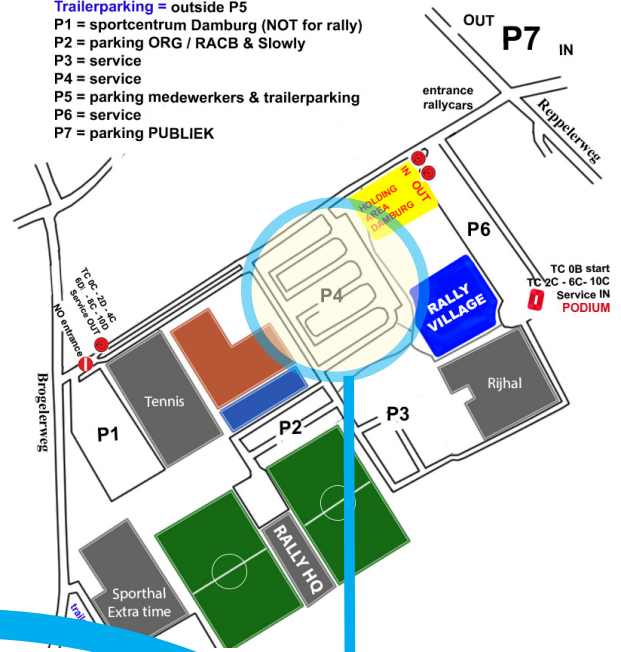

Sur le service P4, **une surface d'appui** (plaque métallique, planche de bois, ...) doit être utilisée sous le vérin à cause des dalles d'herbe en plastique.

A pressure surface (metal plate, wooden board, etc.) must be placed on service P4. to be used under the jack because of plastic grass valleys.
