Route Book Glossary

Controls

ATC, MTC or RGC.

FTC.

Start flag.

Finish flag.

Curves

Straight. In all road/intersection tulips, the dot shows where you enter the tulip, and the arrow shows where you leave it.

Curves of increasing severity. Don't try to infer an exact radius from the tulip. The tulips show the severity of curves relative to each other.

Unless indicated otherwise, mileage is measured at the turn-in point.

Dog leg curves of increasing severity.

Combinations.

Surfaces

Dashed line indicates an inferior road: Narrower or of an inferior surface. This tulip could be used for "road narrows" or "pavement ends".

Straight onto superior surface. Could be used for "road widens" or "pavement begins".

Intersections/Junctions

	Turn on sideroad.
	Turn on inferior sideroad.
	Straight at sideroad, showing some inferior roads.
	Angle indicates angle of sideroad.
	Curves with sideroads. When a curve is combined with one or more intersections, the mileage is measured at the first intersection, unless stated otherwise.
	
	T intersections.
	Y intersections.
	Crossroads.
	Double line indicates divided highway.
	Deltas. Take the short way around unless indicated otherwise.

Signs and Landmarks

	Signs. Usually quoted in the route book, such as “Stop Ahead”.
	Unless indicated otherwise, a sign at an intersection indicates a stop or yield sign.
	Buildings or other structures.
	Trees or other obstacles. Route book will indicate the type of obstacle.
	Bridge, gate or other restriction.
	Action points. Usually a crest or a dip. Mileages always reference the action point. The route book will specify the action point, such as “after crest”, or “mileage at dip”.
	Use caution! Caution level indicates difficulty of the road and the severity of consequence for making a mistake. Used for yumps, severe drops, off camber turns, obstacles, etc.
! Take Care	Use caution when approaching.
!! Danger	Slow to avoid serious vehicle damage.
!!! Extreme Danger	Slow significantly to avoid serious vehicle damage or personal injury.
	All cautions will be marked on course by a single downward-pointing course arrow.
	Open areas. No treeline to follow.

Official Mileages

Mileages in the overall and interval columns are measured to 3 and truncated to 2 decimal places. Given two consecutive instructions measured at 5.327 and 5.461 miles, they would appear in the route book at 5.32 and 5.46 miles. The interval between the two would be .134 miles, and would appear in the interval column as .13 miles, not the .14 miles you might assume.

This represents the mileage exactly as you would see it on a digital odometer with 2 decimal places. Do not worry that the truncated numbers don't seem to add up. They do! It's just that they're truncated after doing the math, just like on a real odometer.

Route Book Additions

Here are some examples of route book features in addition to those described in the rule book:

6	6.13	0.69	!			Spectators Off camber!		10.73
		1.20!			46.42243		-88.78332	

ATC 1

 Time

Radio symbol - Indicates location of mid-stage radio marshal.

Intersection number - Matched to intersection numbers on provided maps.

GPS - Longitude and latitude of this tulip (where given)

Red cross - Identifies midpoint medical location.

Tulip caution - Additional caution symbol for emphasis.

Next page caution - At bottom of page, indicates caution in first tulip on following page.

A convenient place to record your time at controls, starts and finishes.

Speed change (transits only) - Indicates change of speed limit

Speed limit (transits only) - Indicates legal speed limit or transit speed limit, whichever is lower.

The following additional features appear only in organizer books:

6	6.130 ~~6.13~~	0.693 0.69	!			Spectators Off camber! [Marshal M-180 3500]		10.713 10.73 Limited Time (road used again)
14:56					46.42243		-88.78332	

Organizer comments - Comments in [square brackets] are found only in the organizer books; control locations, some road names, etc.

Intersection name - Matched to worker maps.

Banner tulip (banner book only) - Indicates that a tulip needs bannering. Dotted lines show roads to banner. Details on special bannering map, where indicated.

Organizer caution - Marks tulips that need to have a caution arrow posted.

Mileage measurement to 3 decimal places.

First car due - Scheduled time for first rally car to pass this point.

Sweep condition - Indicates how much time available for extractions as defined in the organizer book.
