

## A reminder to all competitors of the SOS 2-step confirmation process:

If the SOS button is pressed, **it must be confirmed as either a fire or medical**, by pressing one of the two middle buttons, this ensures that Race Control is alerted accurately of the situation, and any approaching cars will see the SOS notification.

When the SOS is confirmed, the below screen will display.

Even once confirmed, the hazard can be changed to OK. Pressing CANCEL and confirming the downgrade will inform race control that the crew are OK and do not need assistance.
