

# Service Park Access

Following our previous advice regarding the recce schedule, here is some important logistical information for your arrival and setup at the Service Park located at the Racecourse.

## Rally HQ & Service Park Access

Rally HQ will officially open for all competitors on **Friday morning at 9:00 AM**.

Please be aware that there is **no provision for any access to the venue prior to this time**. The gates will remain locked until 9:00 AM sharp, so please plan your travel and arrival accordingly.

## Service Park Setup & Etiquette

The service park has been designed to accommodate all teams comfortably, but this relies on everyone's cooperation. When setting up your service bay, please be considerate of your fellow competitors.

- **Be Efficient With Space:** Please only use the space that is essential for your team and vehicles. Park support vehicles and trailers efficiently and keep your footprint as tidy as possible.
- **Don't Reserve Excessive Space:** While we appreciate the need for a functional work area, please do not spread out unnecessarily. With everyone's cooperation, there is plenty of room for all.
- **Keep Access Ways Clear:** Ensure all access ways remain clear at all times.

## Important Notice: Ground Conditions

Following the recent weather, some grassed areas within the service park are soft and may be waterlogged. These areas will be clearly marked (e.g., with tape or cones).

It is essential that all teams **give these marked areas a clear berth**. Please do not park vehicles or place heavy equipment on these sensitive spots. Adhering to this is crucial to prevent damage to the racecourse grounds and to ensure our hosts welcome us back in future years.

Thank you for your cooperation in helping us run a smooth and respectful event. We can't wait to get the rally underway.
