ENVIRONMENTAL GUIDE

FOR THE TEAMS

Baja TT Escuderia Castelo Branco

Noise levels must be kept to a minimum in the Service Park and the Event Headquarters.

Competitors driving within the city of Castelo Branco, in local villages and along the connecting routes to the prologue and selective sections, must drive responsibly to reduce noise pollution and unnecessary emissions of exhaust gases.

The use of environmental protection mats or ground protection covers is mandatory in all service areas, to prevent direct spillage onto the ground.

Service teams must transport fuel containers using suitable trolleys, so as not to damage the environmental protection mats provided by the Organiser in the refuelling area.

The Organiser provides a designated area for vehicle refuelling, which is clearly marked for this purpose.

Vehicle washing is strictly prohibited outside the designated location (REPSOL, EN 233, Km 104.750-ES, 6000-067 Castelo Branco). Water consumption must be kept to a minimum.

An Ecological Waste Collection Point will be provided in the Paddock, where teams can dispose of used tyres, contaminated fuel, used oils, as well as other damaged or used mechanical components.

The disposal of wastewater or vehicle toilet waste onto the ground is strictly prohibited in the Service Parks or any other event area.

Teams are responsible for the waste they generate, which must be disposed of at the designated locations provided by the Organiser (recycling points) distributed throughout the Service Park. All waste must be correctly separated according to the relevant waste categories.

Any environmental incident should be reported to the following email address: geral@escuderiacastelobranco.pt or by contacting the responsible environmental officer - Cláudia Lima +351 965 520 222
