

October 2025

Dear All,

Fira Circuit S.L.U., contributing with its actions to achieve the Sustainable Development Goals of the 2030 Agenda, and continuing with Circuit's de Barcelona-Catalunya commitment based on a **3C management "Conscience, Commitment and Coherence"**, certified with the **ISO 14001** since 2025, the **Biosphere** commitment since 2020, **ISO 20121** for 2 races and recently certified with the **CSR Management System aligned with the Sustainable Development Goals**, would like to invite you to carry out the **Racing Weekend** in a **socially, economically and environmentally sustainable way**.

To achieve this, it is necessary that all stakeholders involved in the development of the race behave responsibly in the following aspects:

- **Responsible use and consumption of water.**

Catalunya is prone to extreme droughts which is why we ask you use this scarce resource responsibly. Therefore, **the usage of water to fill up swimming pools and/or for cleaning vehicles is strictly prohibited**. If necessary, use a sponge and a bucket to clean the front and back windows of your vehicle.

Find below **specialized places** where you can clean your trucks:

- **Auto Lavado Llevant Park (5min)** Carrer Tenes, 1, 08150 Parets del Vallès, Barcelona <https://goo.gl/maps/aEv8cAxyh2NP4Xb18>
- **My Truck Wash (11min)** Carrer Calderi, 08130 Santa Perpètua de Mogoda, Barcelona <https://goo.gl/maps/QWvu6ooVPPkYSvDAA>
- **Lavadero Low Cost Canovelles (13min)** Carrer Indústria, 109, Nave E, 08420 la Barriada Nova, Barcelona <https://goo.gl/maps/qVACFQ5kKCRK1qMP8>

On the other hand, water is now drinkable at the Circuit. **You will find 7 water fountains in the paddock in which you can refill your bottles.**

- Make a good use of **energy**.

Since 2017, the electricity supplied to the Circuit is **100% of certified renewable origin**.

The Circuit is committed to energy self-sufficiency and currently has a total of **2,319 solar panels** that occupy a surface of **5,274 m<sup>2</sup>**. Of the total of 2,319 panels, 1,092 are installed on the roof of the Main Grandstand, 1,080 on the roof of the pit building and the rest on the roofs of the washroom building in the Paddock, the Crystal office building and the Services building.

We also have installed a canopy which is used to produce the energy used to charge up to 6 vehicles underneath it

To promote the use of electric vehicles we have **14 electric vehicle recharging points** within our facilities, 5 of which, in the paddock, next to the fuel station. Please do not use the recharging points as parking. Once your vehicle is fully charged, leave the recharging point available to be utilized by other users.

- **KM0 Restaurant** of the Circuit offers healthy and Km0 food.

Km0 gastronomy avoids long journeys of food by means of transport and therefore reduces CO2 emissions.

- **Zero Waste: The best waste is no waste**
  1. Please use water fountains instead of single-use plastic bottles.
  2. Join the **STOP FOOD WASTE** campaign and don't waste food.
  3. Waste and Circular Economy. Please use the bins to dispose of your waste in the appropriate containers. At the **recycling points in each of the paddock towers** you will find the different types of containers to recycle correctly and to recover organic waste, glass, packaging and cardboard. **Find attached the recycling guidelines.**
  4. Please use the containers for the collection of **soiled rags** only and the drums for **waste oil** only. **No other liquids or materials should be placed in these drums.**

The totality of the domestic waste from the event is segregated in containers for: organic, packaging, cardboard, glass and oils. Thanks to everyone's collaboration, we have managed to recover, together with **ECOEMBES, 739.875 kilos of waste since 2008**.

- **Connect with nature. Sustainable Forest management.**

Take a break and visit the Circuit's Educational Crater Forest. The Catalan track is a sports facility that is home to **more than 25 hectares of forest**. For this very reason, Circuit de Barcelona-Catalunya launched in 2019 a project to improve the biodiversity of its forest with the collaboration of a sustainable forest management company aimed at the training and job placement of young people in a situation of social exclusion.

The aim is to **improve our biodiversity, creating a native, autonomous, more attractive, and environment-friendly ecosystem**, adding an educational value, by means of boards describing the actions carried out in the forest, for the enjoyment of and to raise awareness among the attending public.

- **Social Commitment.**

Finally, we want to insist on the importance of **donating uncooked leftover food** instead of throwing it away, which we deliver to the social diner **El Xiprer, in Granollers**, and thus help several families in poverty. This solidarity requires the effort of everyone and the objective of our commitment to sustainability should be none other than to collect 100% of the leftover food from the competition. **Since 2017 we have donated more than 21,000 kilos**. Please find attached the information on the protocol of the food collection.

We invite you to join in all the actions and we count on your commitment and responsibility.

With best regards,

**Ignasi Armengol**  
General Manager

Montmeló, March 2025

Dear All,

We would like to inform you that the Catalan Government has approved on 28th February 2023 a decree-law to protect water supplies, to provide legal framework to speed up procedures for the actions to be carried out, as well as to dissuade and penalise possible non-compliances. The main objective of this Decree-Law is focused on the implementation of measures to guarantee the supply of water to the population. As of now, and after the publication of the “*Resolució ACC/2311/2024, de 25 de juny*”, the Circuit de Barcelona-Catalunya continues in alert status for hydrological drought.

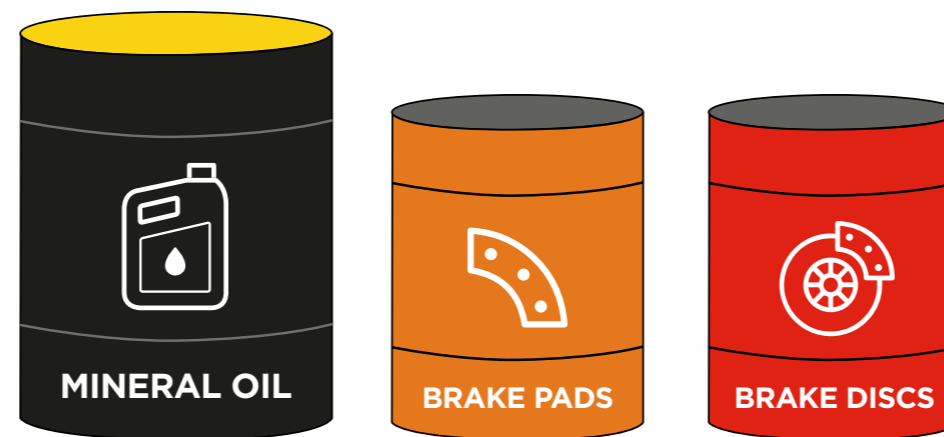

From our **commitment to the environment**, Circuit de Barcelona-Catalunya is very alert to the exceptional situation due to drought, and that is why we are working on restrictions to minimise water consumption in our facilities. For this reason, **we ask you to prioritise water saving** as much as possible and to **use it as efficiently as possible** when carrying out your tasks at the Circuit.

In more specific cases, such as the **cleaning of vehicles**, we recommend that you go to commercial establishments dedicated to this activity and that have water recirculation systems. Inside the Circuit de Barcelona-Catalunya venue it is only allowed to clean windows, mirrors, rear-view mirrors, lights and number plates by using a sponge and a bin; as well as in cases where it is necessary to maintain the safety and health of people (transport of food, ambulances, medical vehicles and transport of medicines, transport of waste, etc.). In any of these cases, the cleaning shall be carried out using the **minimum amount of water possible**.

We would like to thank you in advance for your cooperation in dealing with this exceptional situation and remain at your disposal to clarify any doubts you may have.

Best regards,

# RECYCLING GUIDELINES

## PLASTIC WASTE

- ✓ Plastic bottles, bags, and containers.  
Bubble-wrap, cellophane, and nylon packaging.  
Disposable plastic glasses.  
Cans and tetra briks (eg. tetra brik of milk).

Polystyrene 

- ✗ Carboard packaging.  
Contaminated plastic packaging.  
Aerosols.

## GENERAL WASTE

- ✓ Unrecyclable waste.
- ✗ Waste listed on the other waste streams.

## ORGANIC

- ✓ Organic kitchen waste.  
Scraps of vegetables and fruits.  
Clean and dirty paper napkins.  
Biodegradable and compostable plates, glasses, tableware and bags.

- ✗ Food cans.  
Dippers.

## GLASS

- ✓ Bottles and jars.
- ✗ Crystal.  
Ceramic and porcelain.  
Glass ceramic and pyrex.

## PAPER & CARDBOARD

- ✓ Paper (newspaper, magazines, paper bags, ...)  
Cardboard (packaging, boxes, ...)

- ✗ Aluminium foil.  
Tetra briks (eg. Tetra brik of milk).  
Dirty napkins.

## MINERAL OIL

DIRTY RAGS ONLY

AEROSOL SPRAYS ONLY

BRAKE PADS ONLY

BRAKE DISCS ONLY

# STOP FOOD WASTE CAMPAIGN

We want to ask for your collaboration in our **STOP FOOD WASTE** campaign by donating the food surpluses to “El Xiprer” instead of throwing them away. “El Xiprer” is a local community kitchen that aims to help families and individuals in financial difficulty. Thanks to your collaboration, more than 21,000 kg of leftover food has been donated since 2017.

## ***The foodstuff that is suitable to be donated is the following:***

- › Fruit and vegetables in good condition, in boxes.
- › Refrigerated products in closes, labelled containers, guaranteeing that the cold chain has not been broken (e.g. yogurt, pudding, creams, etc.).
- › Confectionery in boxes, not manipulated.

**To arrange the place, time and date for the collection, please contact:** [svives@circuitcat.com](mailto:svives@circuitcat.com) / M: +34 722 725 165

Staff from “El Xiprer” will come to the arranged location to pick up the food.

Circuit de  
Barcelona  
CATALUNYA

FOR A BETTER WORLD! THANK YOU!
