

	TECHNICAL NOTE	Ref : 2025-03 v1
	Subject : <u>Belcar Endurance Championship – Porsche Endurance</u> <u>Trophy Benelux</u>	Date : 19/08/25

In preparation for the 24 Hours of Zolder, this note is aimed at clarifying some points for Porsche cars participating in the meeting.

This document does not substitute to a careful reading and compliance with all points of the technical regulations.

1. Regulations Compatibility

All Porsche cars participating in the Belcar Endurance Championship (BEC) must comply with the BEC Technical Regulations but also with the Porsche Endurance Trophy Benelux (PETB) Specific Technical Regulations. In case of contradiction between these 2 regulations, the PETB Specific Technical Regulations will always prevail and must be repeated.

As a consequence, only OEM Parts can be installed on the cars except if specified differently in the previously mentioned regulations and official bulletins, and in Porsche Official documents (Technical Manual and Parts Catalog).

Parts cannot be modified except if clearly indicated in the above-mentioned official documents or for safety reasons with the written approval of RACB Technical Department.

Cars must be built according to Porsche reference documents and manuals.

We remind you that everything that is not clearly mentioned in the regulations is considered forbidden.

2. Brakes cooling

As mentioned in PETB Specific Technical Regulations Article 24 :

« For races of 120 minutes or more, additional air cooling for the brakes is free by means of holes in the original bodywork and associated internal ducting. Additional brake cooling must not lead to the addition or removal of parts on external bodywork.

External cooling of the brakes by means of fluid is forbidden.

The airducts cannot exceed the perimeter of the vehicle when viewed from above.

Cooling systems connected to the wheels are forbidden. »

Due to the lack of official Porsche Motorsport parts or kit for this application, this item is free as long as it is conform to the above-mentioned article.

The following types of additional openings are all considered conform :

This is valid for 2025 only and may be revised for later competitions.
