

POLICY FOR LIVERIES AND STICKERS IN PARTICIPATING VEHICLES IV ECORALLYE BILBAO PETRONOR

Event Date: September 29th to October 1st, 2023

Following the respective regulations of the FIA ERRC and RFEdA CEEA championships, participating vehicles may be decorated with stickers, vinyls and decals as per the participant's choice, following some restrictions.

Vehicles taking part in the event should respect the following guidelines in order to ease the inclusion of official numbers and event sponsorship stickers.

- Leave an empty space of at least 40x70cm in both front doors of the vehicle, preferably in the mid-upper section of the door.
- Leave an empty space of at least 25x50cm in the top of the front trunk, close to the front of the vehicle.
- Additionally, the glass areas of the rear door windows (both sides) must be left free in order to accommodate the stickers with the names of the participants (supplied by the organizer).

Spaces which must be free of vinyls, decals and stickers

The rest of the surfaces of the vehicle are free for the participants to decorate their vehicle according to their own preferences. However, all vinyls, decals and stickers cannot show under any circumstance messages, symbols, phrases or any other manifestation that may be deemed offensive, inappropriate or against Spanish road transit laws and safety regulation, under penalty of immediate exclusion if so decided by the council of sporting stewards,

The official stickers of the event, containing the numbers, identification of the participants, and official sponsorship of the event, will be supplied by the organizers to every participant in the administrative verifications, and must be correctly installed before the technical verifications and subsequent admission in the parc fermé.

In order to correctly install the stickers, which include numbers, legends and advertising, the numbers must be always faced towards the front side of the vehicle. The name of the driver must be installed in the top in both sides of the Vehicle, and the name of the co-driver must be installed in the bottom.

Note that it is the responsibility of the participant to promptly dispose of any residues coming out of the process (plastics, papers) in the corresponding recycling bins located in the surrounding area.

The organizer will also supply a special microperforated vinyl containing a safety message, with a dimension of 20x60cm, which will be installed in the vehicle's rear windscreen. This sticker is mandatory under RFEdA regulations.

ATENCIÓN
PRUEBA DE CONDUCCIÓN EFICIENTE
LOS VEHÍCULOS PUEDEN CIRCULAR
MÁS ESPACIO DE LO NORMAL

Safety vinyl for the rear windscreen (supplied by the organizer)

Important notice: All vehicles must be fully decorated and with all official stickers installed before attempting the technical verifications.
