

Google My Maps Link – Sno*Drift 2026

Open the link on your mobile device:

https://goo.gl/maps/GyPb5hGvC2XNq4M3A?g_st=ac

Google Maps will open and automatically add the Sno*Drift 2026 stage maps to your Google Maps app. *This will require cell service to view*, My Maps does not sync with OffLine Maps. For reliable offline stage map navigation, recommend downloading a GPS Navigation App such as OnX, Backcountry Navigator, Gaia GPS etc. and importing the KML/KMZ files.

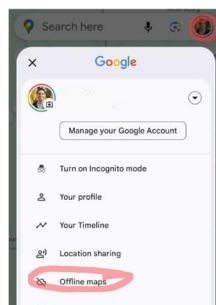

NOTE: This can be disabled/enabled in the “Maps” section of the app under “You” on the bottom banner

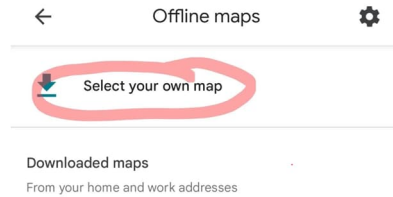

Google Maps - Offline Maps

Recommended to download offline maps for navigation, as cell service in area can be spotty!

1. On your mobile device open Google Maps, select your profile in upper right, then Offline Maps

2. Select "Select your own map"

3. Scroll the window around the Atlanta and Lewiston Michigan area, select Download. Once downloaded, the entire area selected will be available offline with no cell service!
