### Introduction

This setup guide is intended to show the main features required to set up the stage safely and in accordance with Motorsport UK requirements as set out in the Motorsport UK Yearbook 2024 (updated 1-03-24 ) sections 28 and 29, and in particular Stage Rally Safety Requirements (edition 6), the Mull Rally Safety Manual and any directions from senior officials of the event.

### Junction numbers and warning arrows.

Every post unless immediately following another should have a warning arrow and junction number placed 100m (+/- 10m) before the post.

### Gateways

All gateways, paths, tracks and access to the rally route should be clearly taped with red/white tape. Appropriate warning signs (As per Stage Rally Safety Requirements) should be positioned approaching the route.

There may be more gates/paths/tracks that are not necessarily depicted in this setup book, but **all** will need the necessary signage and tape:-

Some taping examples:

Double gate (Manual - tape around the lock)

Double gate (electric)

Single Gate (tape around the lock)

Gate piers

Track (using stakes)

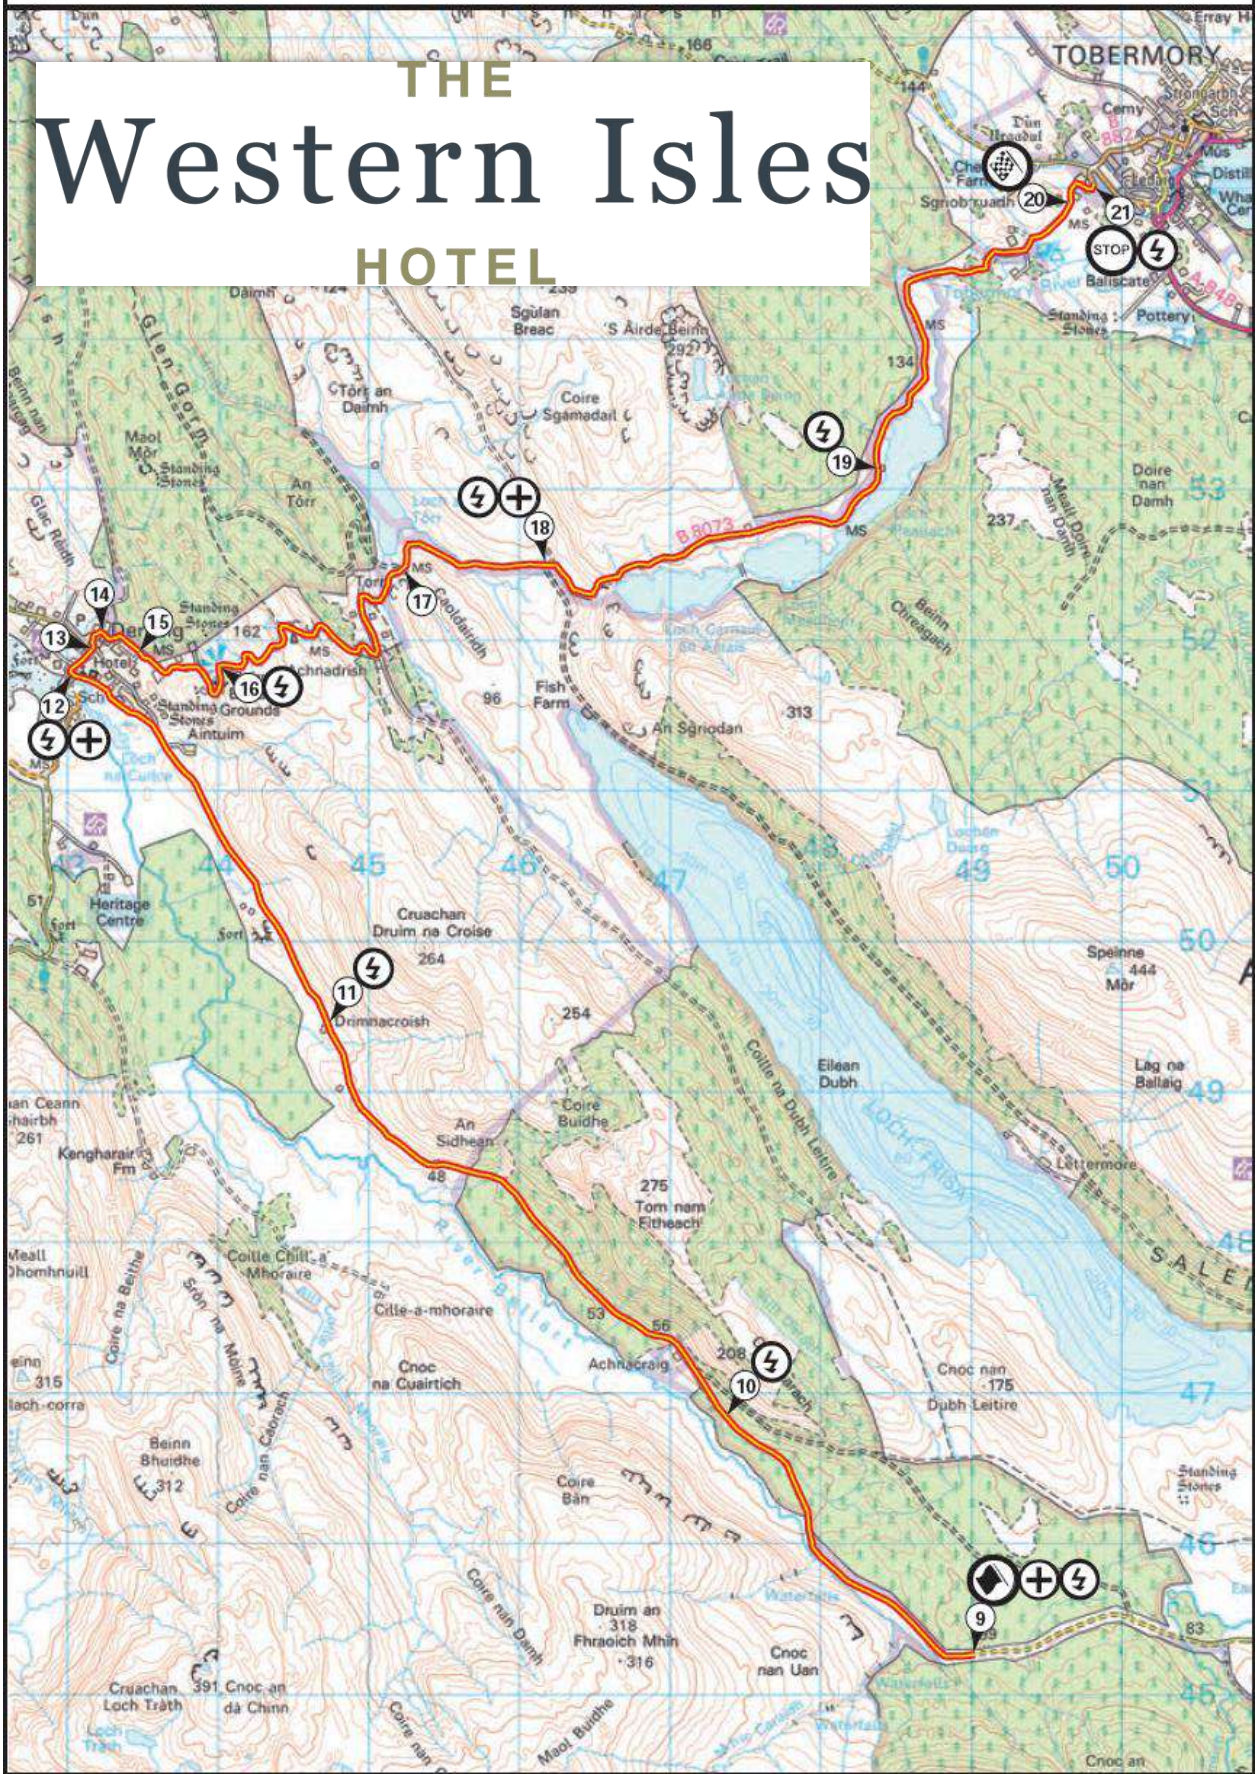

All setup crews should consult the stage commander, if in doubt as to how the gate/track should be taped and which signs to use.
