### **ENVIRONMENTAL POLICY DEMANDS**

We at Rally di Roma Capitale are trying to achieve important milestone on our Environmental Policy, and to do so' we need the collaborations of all the Teams and Crews.

As you all known conserving water in Service Park is essential to minimize waste and promote sustainable water usage.

As organizers we would like to suggest you six best practices to save water at your workplace:

1. **Educate Team Members:** Raise awareness among employees about the importance of water conservation. Encourage them to report any water-related issues and provide tips on how to save water in their daily activities.
2. **Set an example:** People learn by observing leaders. Be a role model by following water-saving rules yourself.
3. **Be mindful of the hose:** Teach Team Members not to leave hose running when they're not using it water actively. Turn it off when done.
4. **If you have dishwasher in your catering only run with full loads:** it's more efficient to wait until there's a full load before running the washing machine or dishwasher.
5. **Don't Wash any Spare Parts or Car in the Service area:** Brief your team members on the fact the washing parts or cars in service area is forbidden.

By following these water-saving practices, your Team can contribute to water conservation efforts and reduce its environmental impact.

The Clerk of the Course

Mauro Zambelli
