

FIA European RX3 Rallycross Championship

Information from Hoosier Racing Tire

Dear RX3 Teams, due to some challenges in global logistics -specifically freights to and from the USA- and the tight calendar in 2025, we regret to inform you, that we have to run the 2025 season on the harder version of our RX tire. That is the tire we used in all classes throughout the 2024 season.

This is to ensure supply of one and the same tire throughout the entire season 2025.

For those of you who have purchased the softer tire in the Lousada Test:

- we will take back every unused tire and replace it with the 2024 specification tire.

For those of you that have used tires from the Lousada EoT test:

- we will also replace your used tire with a free of charge new tire for 2025 use.

For all of you competing in the RX3 Euro Championship in 2025:

- we will provide a discount of Euro 200,00 net per set throughout the entire season.

We are sorry for the inconvenience this may cause. Unfortunately, we have to make this decision now to not run into an issue mid-season.

For any more information please contact - Gavin Rose-Johnson
