

Wheel Rim Guidance

The Hoosier Dry and Wet tyres that are supplied for the FIA WRX Championship are designed and evaluated using RX homologated racing wheel rims which conform to the European Tyre and Rim Technical Organisation (ETRTO) Type R standard. Multiple wheel brands from approved suppliers are considered in this process (these include Braid and O.Z.)

If tyre mounting / unmounting difficulties arise due to the use of wheel rims that do not follow this standard, or if tyre mounting inflation pressures approach or exceed the regulation 8 bar limit (as per regulation 9.2.6 Sporting Regulations of the FIA World Rallycross Championship), Hoosier will advise the team and request that an alternative wheel is provided before mounting can be completed.
