

ARA APPROVED CAMERAS AND MOUNTING

Insta360 GO 3S

The camera may be affixed directly to the padding of the helmet by using hook and loop (such as Velcro) or double sided tape. The camera may not be mounted to any portion of the exterior shell. The helmet or padding of the helmet must not be modified to affix the camera. Foam or soft padding may be used to space or aim the camera. Only the camera, not the housing, may be affixed to the padding.

The ARA has no affiliation with Insta360

ARA APPROVED CAMERAS AND MOUNTING

Cambox V4 Pro

The camera may be affixed to the padding or visor of the helmet by using hook and loop (such as Velcro) or double sided tape. The helmet or padding of the helmet must not be modified to affix the camera.
