How many tires I can order for the first race ?

How many tires can I order?

The number of tyres presented for registration by the scrutineers is limited to 6 (six) per Driver for each Competition (maximum 3 front and 3 rear). Maximum 4 can be newly registered (maximum 2 front and 2 rear). If the Competitor does not register new tyres, then the tyres he uses must have been registered during a preceeding Competition of the Championship.

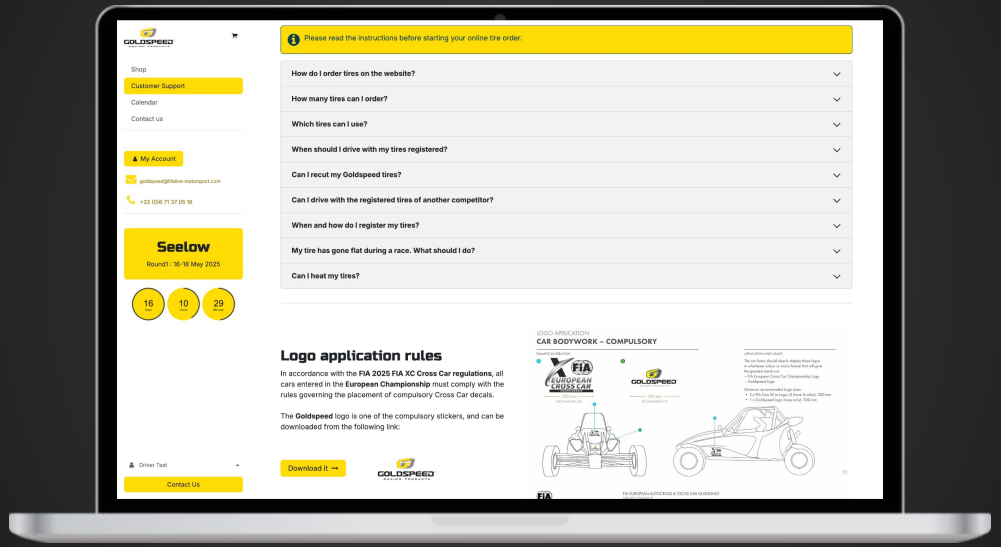

For the Driver's first participation in the Championship, all 6 tyres will be newly registered.

You can order as many tyres as you like online, but we will only be able to provide you with the maximum allowed during the race, in accordance with FIA regulations. Therefore, please only order the number of tyres permitted.

Each order must correspond to one driver. If you have multiple drivers, please place a separate order for each one.
