The Mireo GPS tracking device is designed to track the movements of competitive vehicles for the duration of Rally for safety reasons.

Competitors pick up the device during the "Verification" with a driver's license deposit, and at the time and place specified by the race organizer as the "Special Competition Regulations".

Installation of the device is carried out in the "SERVICEA ZONE" and is carried out by the competitors themselves or their mechanics. In case competitors do not have a connector model used to connect Mireo GPS devices (Fig. 2), they can get them from the Mireo operator for an additional cost of 5€.

During the competition switch on the Mireo GPS device (fig. 1.) , must be in position "0".

If there is a need for intervention (firefighters, emergency medical attention), the switch is switched to position "1" (SOS), and in the HQ Rally, an "SOS ALARM" is activated with the starting number of competitors and its position on the speed test (BI/SS) or stage.

During the race, the return of the device will take place at the HQ Rally, within the estimated time set by the organizer. This applies to competitors who have missed or completed the competition for any reason.

Other competitors return the devices after the finish, in the final parc ferme, unless the organizer decides otherwise.
