Competitor Bulletin 6

Issued: March 6, 2026

B-6-1 Arrival Time Calculation With Neutral Zone:

For stages that include a Neutral Zone, teams should use the time-of-day finish time to calculate their stage time for the purpose of calculating arrival time at the next control.

Use the later of the time-of-day finish time or the start time plus lateness time to calculate your arrival time at the next control.

Josh Keatley
Clerk of the Course
