Attention: Teams and Riders

In order to prevent the spread of invasive species across different regions and countries, all teams and riders are kindly requested to ensure that motorcycles, equipment, and riding gear are thoroughly cleaned and washed after each use.

Particular attention must be given to removing any soil, mud, organic material, or debris that may be transported from one location to another.

This measure is essential to protect your local ecosystems and biodiversity and to support environmental sustainability in all event locations.

We appreciate your full cooperation and commitment to this important matter.

Thank you.

The sustainability team
