

## Rallying can be Sustainable, with Bath Motor Club!

***“As a discipline that uses the natural environment to create its events, the Rally Community view themselves as stewards of the environment. Working together with Motorsport UK, our venues and our spectators, to reduce our greenhouse gas emissions, protect biodiversity and work with local communities to run our events, that ensures that they can go on for years to come.”***

The above is a statement from the new Sustainable Rally Charter from Motorsport UK, and is fully endorsed by today’s rally organisers, Bath Motor Club.

Bath Motor Club is absolutely committed to the protection of the environment, reducing any detrimental impact of its events on the environment and improving the sustainability of motorsport in the UK. We operate an Environmental Sustainability System (BESS), and are the first UK Motor Club to be awarded the Motorsport UK Sustainability Accreditation for this. We were also delighted to be awarded the Motorsport UK Sustainable Club of the Year for 2023, in our 60<sup>th</sup> year as a motor club! We ask for your support in this, please.

A big contributor to this is our calculation of all the Carbon emissions from the event, which will lead to our investment in thousands of trees, which over their lifetimes will more than offset all our events mileages, by marshals, officials, competitors and spectators’ cars. Bath Motor Club members voluntarily plant and maintain all these trees ourselves, and have done so for three years now.
