12.16 LED Repeater

A LED Repeater, provided by SAS as part of the usual kit (including wiring and mounting plate), will be mandatory in all competing cars and must be installed before scrutineering in the driver's direct line of sight, in accordance with the user guides supplied by SAS. The LED Repeater repeats key safety messages from the tracking system (e.g. Red Flag, SOS/Hazard/Road Blocked, Push-to-Pass, Flying Finish), allowing the driver to keep eyes on the road while still receiving critical information. It is also intended to attract the crew's attention to consult the tracking screen for more detailed information. It does not replace flags, boards or marshals, but is an additional visual aid to help crews react quickly and consistently for their own safety and the safety of others.

The LED Repeater will also indicate the speed in the Virtual Chicane Zone, please refer to this [link](#) for a demonstration of how it works

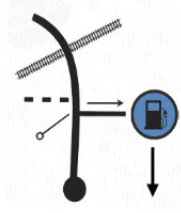

12.17 Deceleration Area

In accordance with Article 5.5.4.1 c) of appendix H of the 2026 FIA International Sporting Code, in order to reduce the arrival speed at the stop point on each special stage, the organiser will place barriers on the right and left sides of the road to force crews to slow down. These modules will be placed 100 meters before the stop point. The locations will be marked during reconnaissance and are shown on the **Road book stage setup plans shared by email on Tuesday 25th August.**
