2. DRIVERS BEHAVIOUR

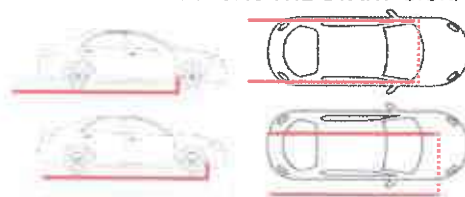

- 2.1 Maximum speed after the stopping of a practice/qualifying session or suspending a race is 80 kph.
- 2.2 Maximum permissible speed during the "Full Course Yellow" intervention is 80 kph.
- 2.3 Before the start or restart of the practice and qualifying, NO car is allowed enter the fast lane, when the Pit Exit is RED (except the situation, when race direction open the fast lane).

3. STANDING START

CORRECT POSITION BEFORE THE START SIGNAL

WRONG POSITION BEFORE THE START SIGNAL

4. SAFETY CAR

- 4.1 According to the FIA ISC, Appendix H, Art 2.10
- 4.2 In order to avoid the likelihood of accidents before the safety car returns to the pits, from the point at which the lights on the car are turned out drivers must proceed at a pace which involves no erratic acceleration or braking nor any other manoeuvre which is likely to endanger other drivers or impede the restart.

- 4.3 It is clarified from that same point all parts of a driver's car must remain fully behind the car ahead until the race resumes (crossing the control line) - see drawing below.

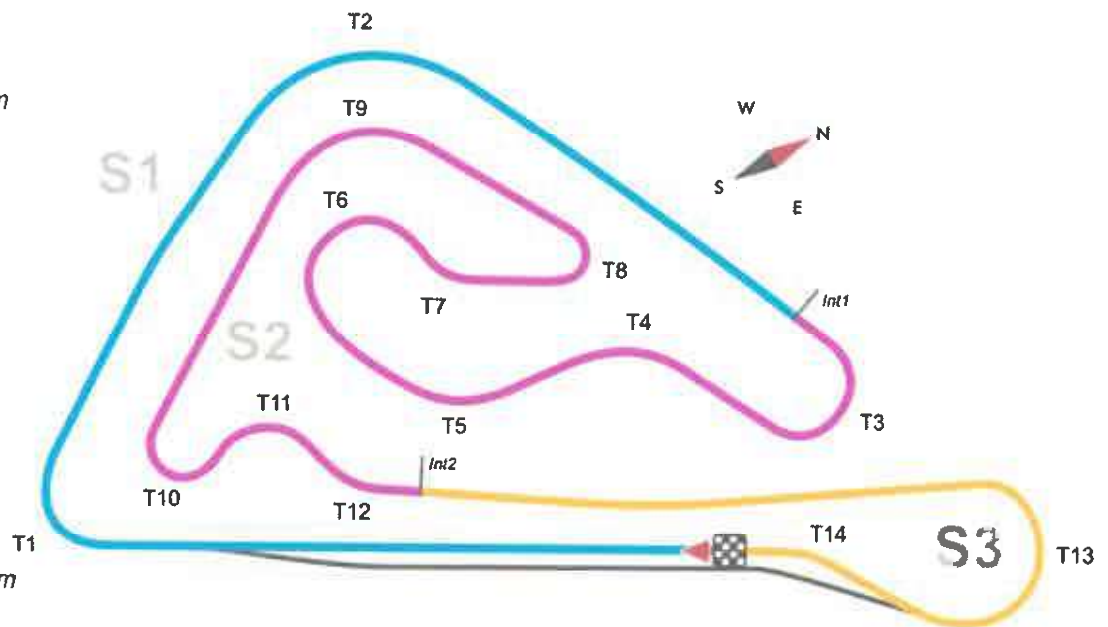

5. OFF TRACK AT T1

- 5.1 Any driver going straight at T1 must re-join the track by driving through the 3 rows of tyre-barriers in the escape road, to the left of the first, to the right of the second and to the left of the third row and proceed safely to the race track. A driver is not allowed to gain any advantage by driving through this escape road. This escape road is not considered as a part of the track, which means, the drivers on the track have a priority.
