

FIM SuperEnduro World Championship 3rd of Jan. 2026

WT Energiesysteme Arena Riesa

Environmental Map

1. **Environmental Impacts**

This mainly concerns the journey of fans and spectators to and from the venue.
The journey to the venue is possible by public transport.
2. **Cleaning**

Routine Cleaning will be carried out by a specialised and certified cleaning company throughout the event.
See appendix 2, figure 11 for details.
3. **Waste from Participants**

The disposal of waste will be carried out by a specialised and certified company.
This will be done continuously before, during and after the event.
Containers for the separation and disposal of special waste (oil, tires, etc.) will be available.
The locations of these containers will be clearly signposted.
See appendix 2, figure 26 for details.
4. **Waste from Spectators**

The disposal of waste will be carried out by a specialised and certified company.
This will be done continuously before, during and after the event.
Facilities for the disposal of this waste are already part of the venue's existing infrastructure.
5. **Bathroom Facilities for Participants**

Cleaning will be carried out to a standard, inspected and logged, in accordance with legal requirements.
This will be carried out by a specialised and certified cleaning company.
