

Key regulations for 2026 Irish Tarmac Rally Championship

The NAPA Auto Parts Irish Tarmac Rally Championship has announced clarifications on key regulations for the 2026 season, following the successful start to the Wales Motorsport Fabrication Historic series on November's Killarney Historic Rally.

The championship organiser's focus turns to the start of the remaining categories on January's Galway International Rally.

Regulations to note:

1. For 2026, ITRC rounds will operate a controlled fuel policy for registered ITRC competitors in its International category. The fuel will be ELF Racing Fuel, made available by dedicated supplier Euro M-Sport.
2. Competitors' championship scores in International, Modified, and Junior categories will be calculated from their best six results from the seven-round calendar, allowing one dropped score. Historic competitors will be scored from their best six results from their eight-round calendar.
3. The final round of the championship will award points and a half, increasing the stakes for the season finale while still rewarding consistency throughout the year.
