Automobile Rally “Rally Elektrėnai 2026”

EVENT SAFETY RULES

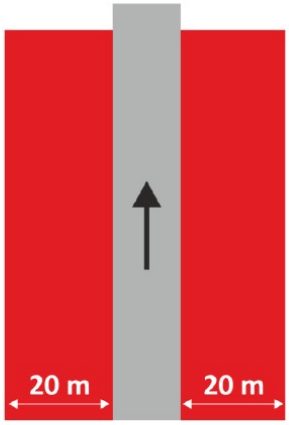

The safety rules (hereinafter - the Rules) of the automobile rally “Rally Elektrėnai 2026” (hereinafter - the Event) have been prepared in accordance with the provisions of Article 18 of the Law on Sport of the Republic of Lithuania and the regulatory acts of the Lithuanian Automobile Sport Federation (hereinafter - LASF). Participants and spectators of the Event must comply with the safety requirements and prohibitions established by the Organizer and specified in these Rules.

The Organizer officially informs LASF about the organization of this Event and, within the time limits established by LASF, submits the Event Regulations (Supplementary Regulations of the Competition) and these Rules.

ARTICLE I - SPECTATORS

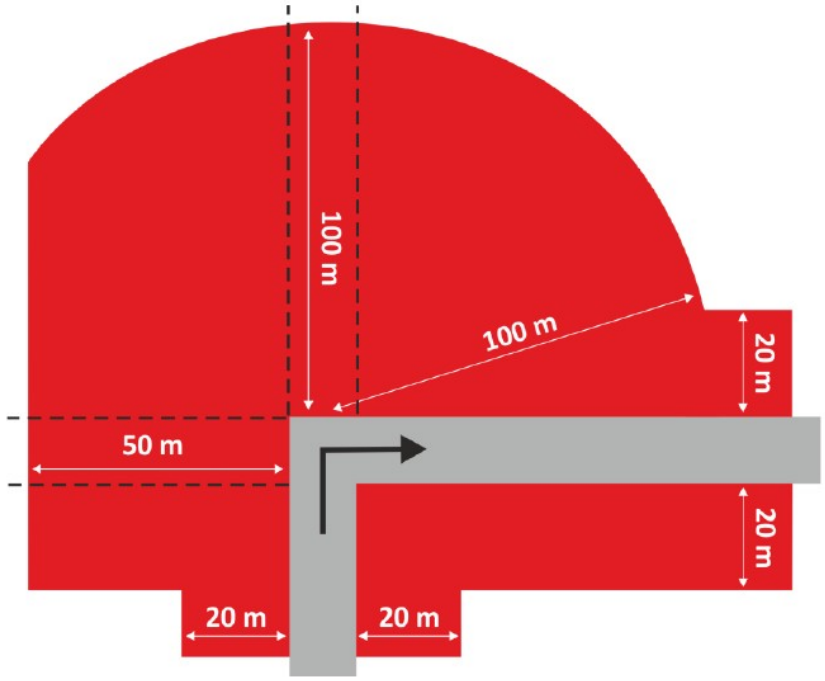

1. The term Course includes all Special Stages and each Special Stage individually. A Special Stage includes the section from the entrance to the Time Control post to the exit from the STOP control at the end of the Special Stage. The running of the Event on a Special Stage covers the period from the departure of the SAF car (yellow beacons) from the start post until the sweeper car (green beacons) passes the finish post.
2. Spectators must comply with the provisions of these Rules while watching the Event. Where other information measures (personnel, signs, tape, etc.) do not prohibit approaching the competition course or other hazardous areas more closely, Spectators must nevertheless comply with the provisions of these Rules.
3. Spectators must follow the instructions of personnel working on the course.
4. For viewing the Event, the Organizer may establish special Spectator Zones (the conditions for Spectator access to and departure from Spectator Zones are specified in the Competition Guide published by the Organizer). Spectator Zones are established in particularly safe locations.
5. Access routes and/or pedestrian approaches to the courses are indicated in the Competition Guide or competition maps published by the Organizer.

6. Spectators may also watch the Event from other locations, but only after familiarizing themselves with these Rules and while complying with the requirements specified herein.
7. Watching the Event on private property is prohibited (except where permission has been obtained from the owner of the private property).
8. Consumption of alcoholic beverages and psychotropic substances while watching the Event is prohibited. It is also prohibited to be in the Event area while under the influence of alcoholic beverages and/or psychotropic substances.
9. Cars may suddenly change direction due to crew error, a mechanical failure of the car, the condition of the course, or a change in terrain. Therefore, Spectators must keep their attention (gaze) focused at all times on the cars travelling on the course. This allows a threat to be noticed very early and enables movement to an even safer location. At the Event viewing location, it is particularly recommended not to gather in groups, sit or lie down, or engage in activities other than watching the Event.
10. It is prohibited to be (drive, walk, stand or lie down) on the carriageway of the Course or within 20 metres on either side of the carriageway (red zone in the figure):

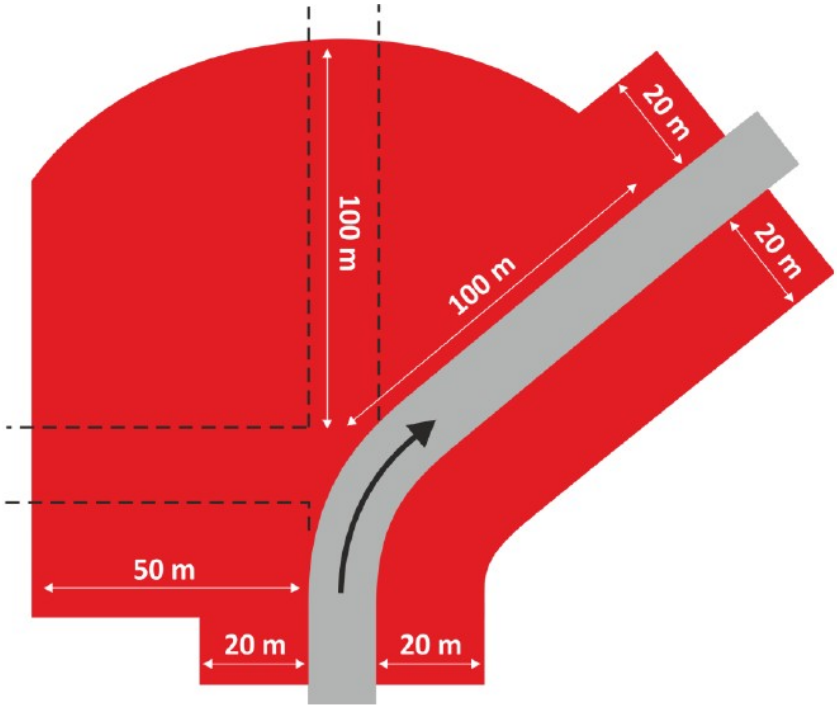

Straight section of the course

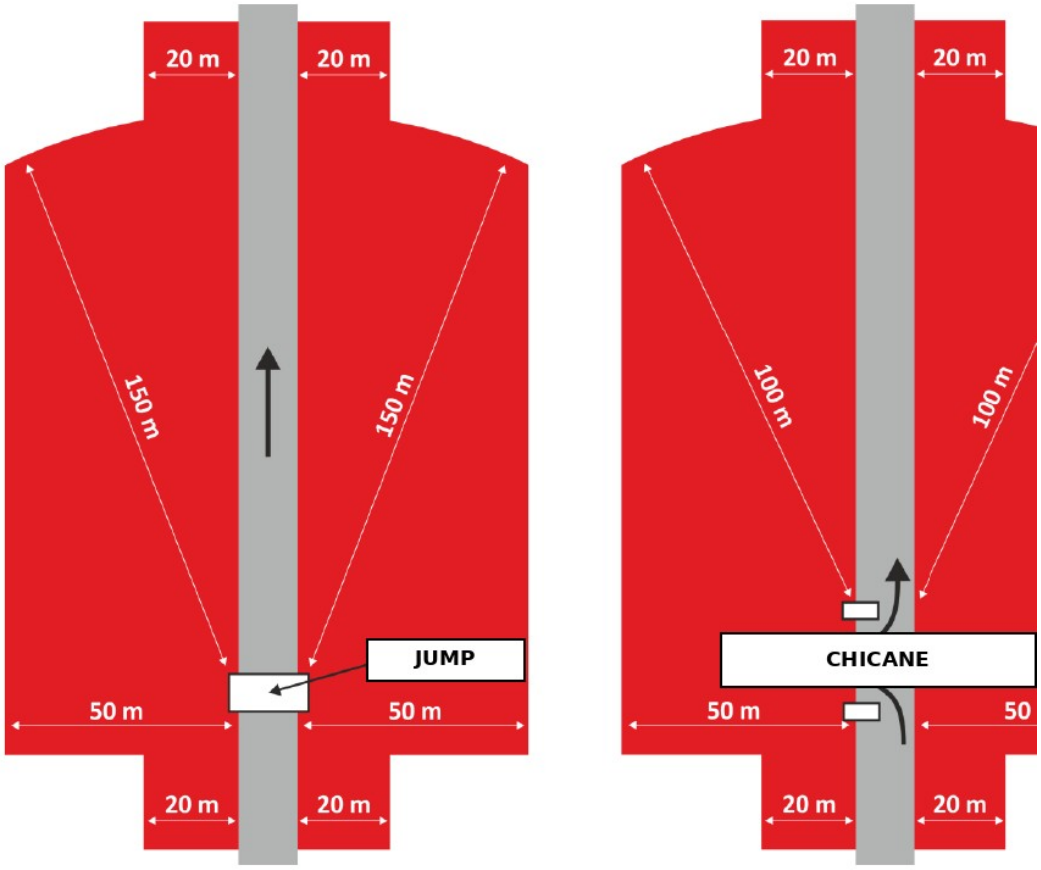

11. It is prohibited to be on the carriageway of the Course and in the zones marked in red in the diagrams around junctions, bends, jumps and chicanes:

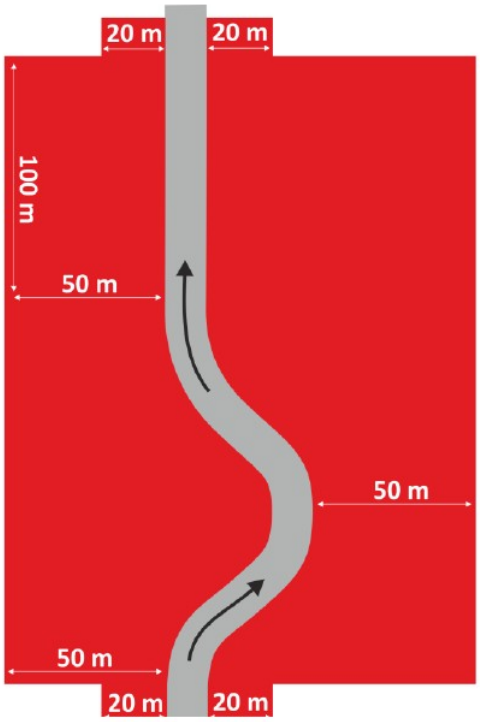

Bend (junction) with an angle of 90° or less

Bend (junction) with an angle greater than 90°

Jump and chicane on a straight section of the course

Sequence of bends

12. In the event of a crash or other accident, Spectators may assist injured persons only after being completely certain of their own safety. Where necessary, they must call for assistance. Spectators are prohibited from righting an overturned car if the crew member(s) are unconscious and are not exposed to any additional danger. It is also prohibited to unfasten the safety harnesses of the crew member(s), as this may cause additional injuries and may complicate the rescue operation. If there is a risk of fire in the car, Spectators, only after being completely certain of their own safety, must switch off the master electrical switch, which is usually located at the lower part of the windscreen and marked with the following symbol:

If there are signs of fire in the car, Spectators, only after being completely certain of their own safety, must activate the automatic fire extinguishing system, the switch or handle of which is usually located at the lower part of the windscreen and marked with the following symbol:

Io lango apatineje dalyje ir pazymeta

13. When medical and rescue personnel arrive, Spectators must move at least 100 metres away from the accident site and must not interfere with the rescue operation.

14. The Organizer familiarizes Spectators with the requirements of Article I of these Rules by providing printed information at ticket sales points and at the competition headquarters. Spectators are also familiarized with the requirements of Article I of these Rules when purchasing electronic tickets at www.bilietai.lt. These Rules are published on the Organizer's website, social media, and other information sources (www.autorally.lt, www.bilietai.lt, and the Facebook and Instagram accounts @rallyelektrenai). These Rules can be downloaded by scanning the QR code placed on information boards at access points to the course and on wristbands intended for Spectators.

ARTICLE II - PARTICIPANTS

15. By signing the Event participant entry form, Participants undertake to comply with the Event Regulations (Supplementary Regulations) prepared by the Organizer, these Rules, and the requirements of other regulatory acts specified by the Organizer.
16. Participants must comply with LASF regulatory acts, the Championship Rules, the Championship Regulations, and the Technical Regulations.
17. The provisions of the Road Traffic Rules apply to Participants' conduct and incidents outside the Course (Special Stages).
18. Participants must comply with the instructions (visual, written or verbal) of the Organizer and/or personnel servicing the Event.
19. In their assigned service areas, Participants must have at least one 4 kg or 6 kg fire extinguisher and a liquid-impermeable groundsheet placed under the car (minimum dimensions 3 x 5 m).
20. The conditions for Participants' access to and departure from the Event venue, the specified areas and facilities which Participants are prohibited from entering, evacuation routes from the Event venue, conditions for safe conduct during the Event, and specific measures intended to ensure order and safety within the Event area and its approaches are set out in the 2026 Rally Rules, the Regulations, the Technical Regulations, and the Supplementary Regulations of this Competition. The above-mentioned regulatory acts have been prepared in accordance with FIA and LASF regulatory acts.
21. Participants familiarize themselves with FIA and LASF regulatory acts before driver licences are issued to them (all documentation is available at www.fia.com and www.lasf.lt). Participants are informed about the Supplementary Regulations of the Competition, the itinerary and other documents on the Organizer's website, social media, and other information sources (www.lasf.lt, www.autorally.lt, "Sportity", and the Facebook and Instagram accounts @rallyelektrenai).

ARTICLE III - FIRST AID

22. First aid is provided in accordance with the LASF First Aid Procedure and the general legislation of the Republic of Lithuania governing first aid and medical assistance.

ARTICLE IV - RESCUE SERVICE

23. Rescue operations are carried out in accordance with the general legislation of the Republic of Lithuania governing rescue operations.
