Vehicle safety equipment

- Seatbelt
- Seat
- Roll cage padding
- Fire extinguisher
- Fuel tank (cell)

Driver equipment

- Fire protective clothing
  - Suit
  - Gloves
  - Shoes
  - Underwear
- Helmet
- Frontal Head Restraint

Frontal Head Restraint

With FHR

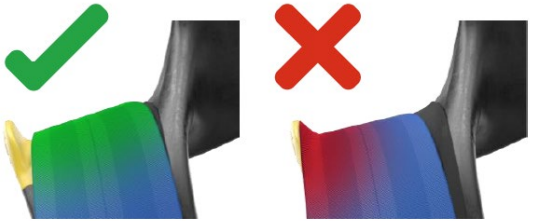

Without FHR

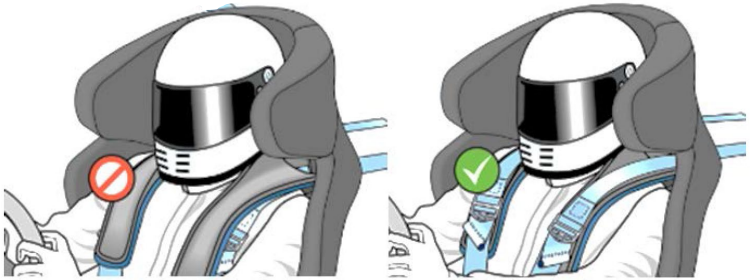

Frontal Head Restraint

Shoulder straps must pass over the FHR

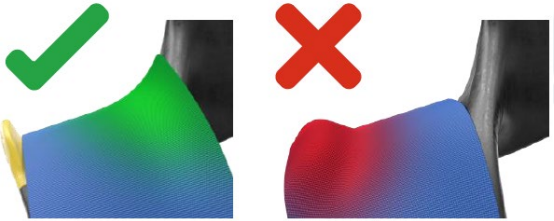

Routing of 2" webbing

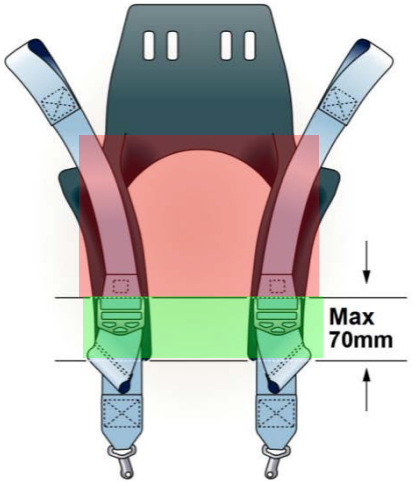

Routing of 3" webbing

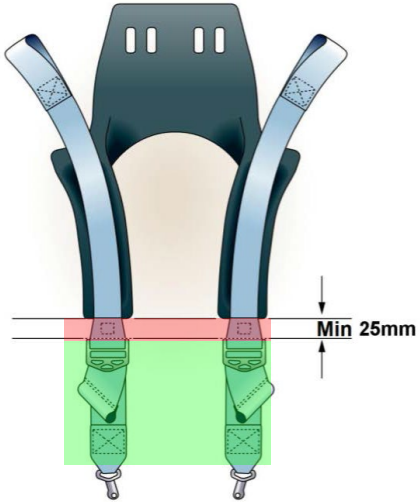

Frontal Head Restraint

Caution: adjuster in the vicinity of FHR must be properly positioned

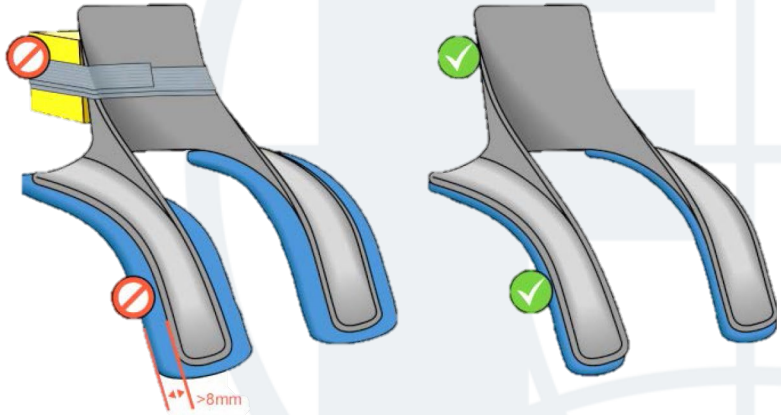

Frontal Head Restraint

Comfort padding allowed – must be flameproof

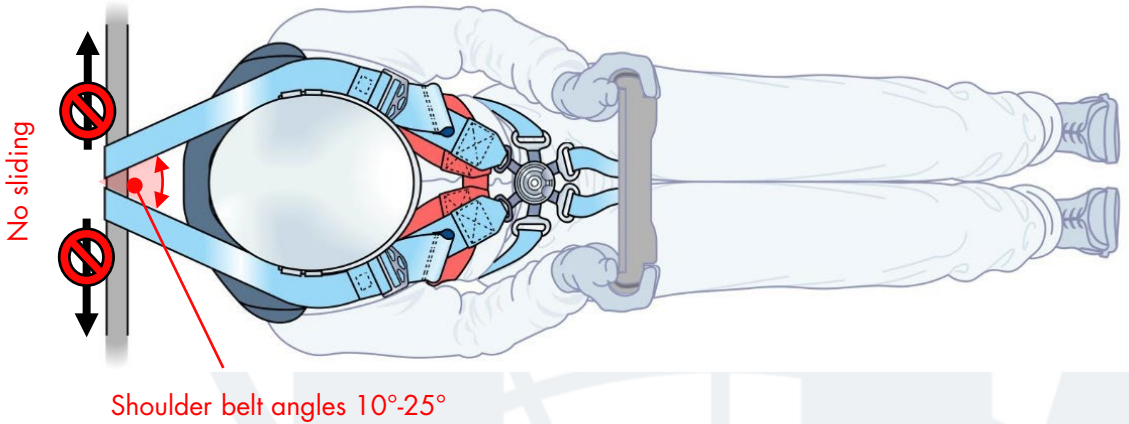

Seatbelt

Correct installation optimizes driver retention

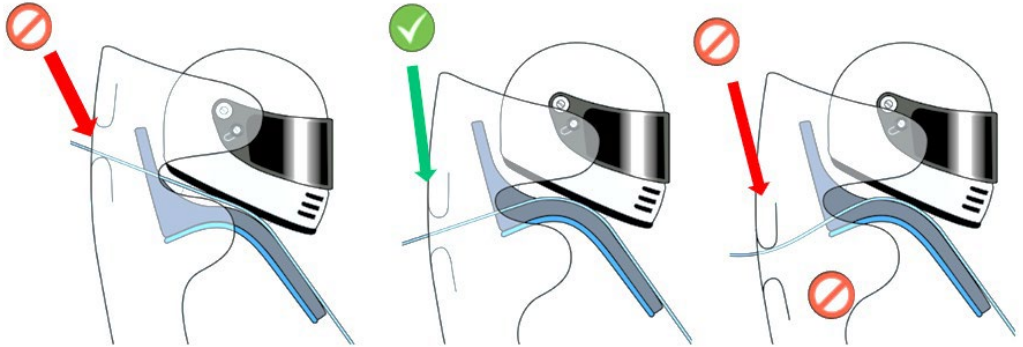

Seatbelt

The harness straps should be in maximum contact with the FHR and not touch the seat slots

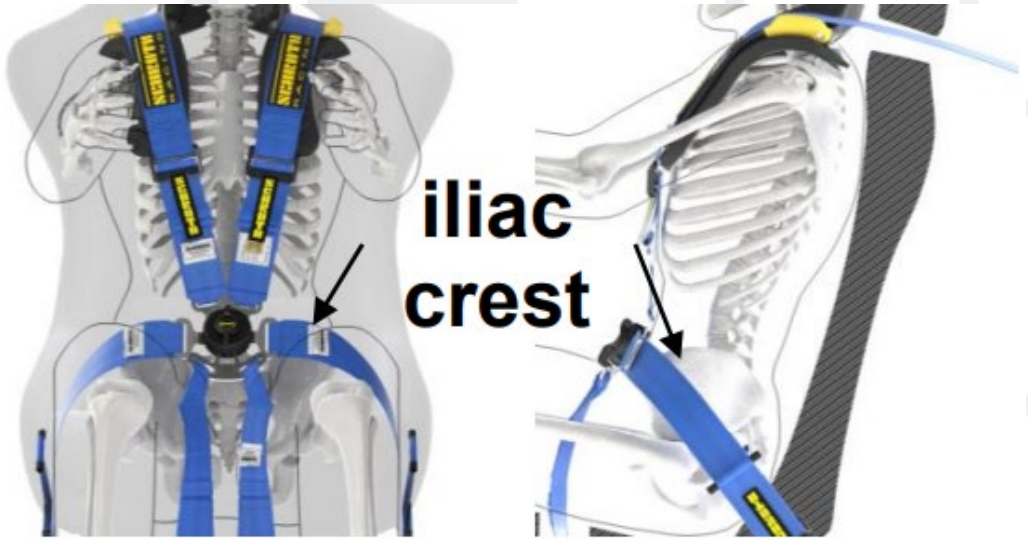

Buckle positioning

Lap straps must pass over the pelvis (iliac crest)

Buckle positioned too high will reduce effectivness of lap straps

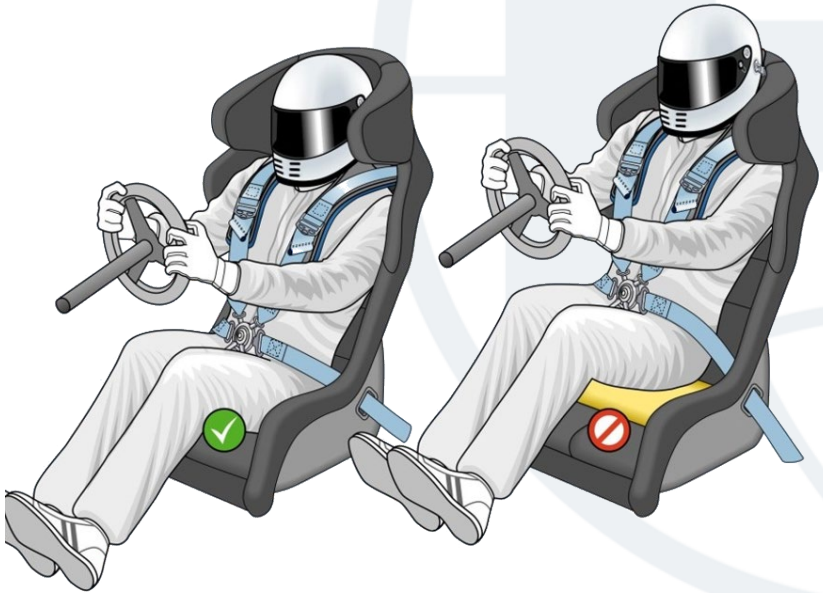

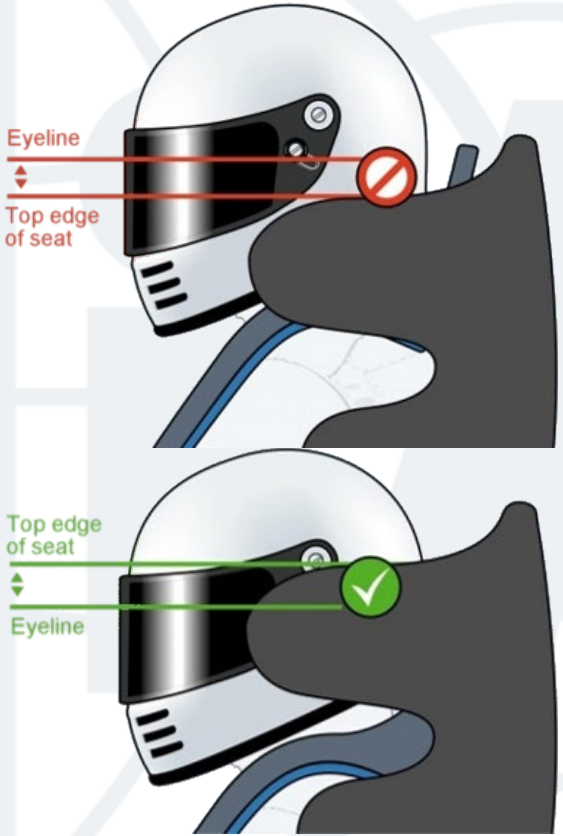

Seat

Seating position

No modification on seat shell & supports

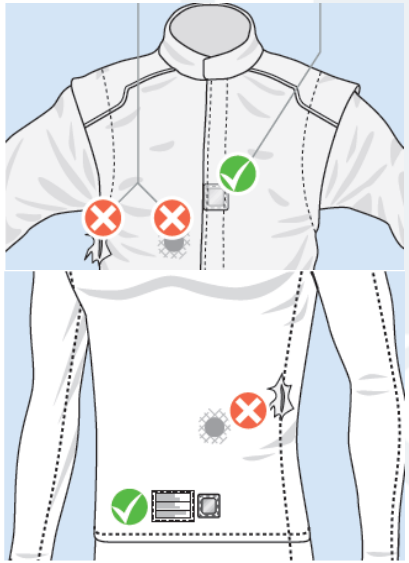

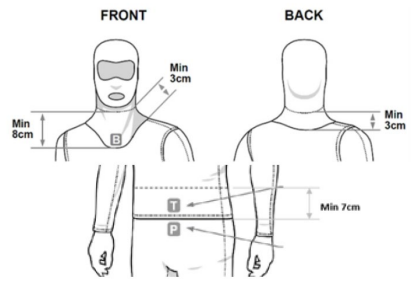

Fire protective clothing

1. Customization must be done by original manufacturer
2. Check for holes and damages
3. Equip the clothing correctly

Pre-Race Checks

Vehicle fire protection systems

1. Fire suppression system

- All originally homologated elements must be used
- Check the pressure of the bottle before the race
- Put the extinguisher in ARM mode

2. Fuel tank

- Homologated according to FIA standard
- Check the validity of the tank
- Check for damage or deterioration on surface level

2026 FIA INTERCONTINENTAL DRIFTING CUP

Technical Matters

Frans Steilberg: FIA Technical Delegate

Dainis Akmentins: FIA Assistant Technical Delegate

Alexios Marantzidis: Chief National Scrutineer

Competitor Safety

HELMET

A full-face helmet and visor meeting FIA Standards 8859-2015, 8859-2024, 8860-2010, 8860-2018, mandatory.
The helmet visor must be closed at all times during on-track activities.

Competitor Safety

FIRE EXTINGUISHER SYSTEM

Safety pins (if equipped) **must be** red-flagged and be **removed before entering the designated burn out area.**

Competitor Safety

Competitor Safety

REFUELLING

There will be a designated fuel refuelling point. Refuelling in the paddock is strictly forbidden. Only two cars may refuel at the same time; all others must wait in the queue near the refuelling zone. Team members per forming refuelling are strongly recommended to wear gloves and protective glasses.

Wearing clothing that fully covers legs and arms, as well as closed shoes, is mandatory-no shorts or short shirts allowed .

The number of team members involved in refuelling should not exceed two people

Competition Timeout

- **Only one (1) Competition Time-out per Competitor**
- **Competition Time-out only during Tandem Battles**
- **Final Information during Briefing 3 *(Friday 1600hrs)***

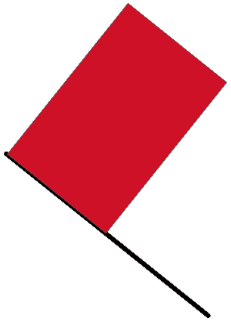

2026 FIA INTERCONTINENTAL DRIFTING CUP

General Organisation

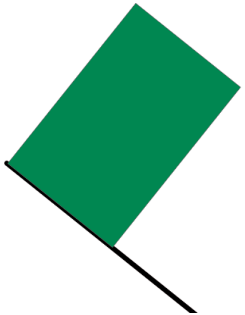

Janis Bluss

Flags and Signaling

Red flag/ Red lights – used by marshals on track as cancelation of the run due to a hazard on track. **Immediately decrease speed**, continue to the finish area if safe to do so or stop on the track if requested to do so by an official.

Green Flag – **If Starting lights malfunction** – Will be used by start line marshal as a starting flag falling from top to bottom

GENERAL OBSERVATIONS

- Smoking is permitted strictly in designated areas.
- Glass containers and alcohol are prohibited in the paddock and on the track.
- Speed limit in the service area (from the paddock to the start) is 10 km/h; after finish line, until you reach the paddock, speed is limited at 50 km/h.
- After a crash, do not leave the car unless it is on fire — this is a critically important safety rule.
- In case of a fire ingniting during a run, immediately stop and go as close as possible to a Marshall post.

WARM UP ZONE

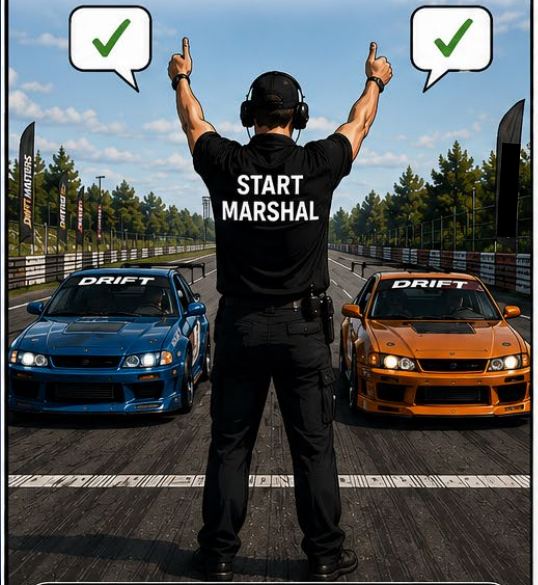

- Drifting and burnouts are prohibited when crossing to the starting area or paddock. Any violation will result in a penalty.
- Tire warming is allowed only in the warm-up (“burnout”) zone/boxes.
- Changing or checking tire pressure is prohibited in the warm-up zone during the race. This must be done before hand in the pre-start area. Any team members entering the pre-start area must wear a high-visibility vest.
- Mechanics are not allowed to touch the car after it leaves the pre-start zone. This rule applies only during qualifying and tandem runs.
- Standing still burnout is prohibited, Car must be in movement all the time.

START PROCEDURE IF THE START LIGHTS FAIL

THE START WILL BE GIVEN USING A GREEN FLAG

FIA INTERCONTINENTAL DRIFTING CUP

1 THE START MARSHAL SHOWS A THUMBS-UP TO EACH DRIVER

DRIVERS MUST CONFIRM BY GIVING A THUMBS-UP BACK.
Make sure both drivers are ready and have acknowledged the start signal.

2 THE START MARSHAL RAISES THE GREEN FLAG AND HOLDS IT UP

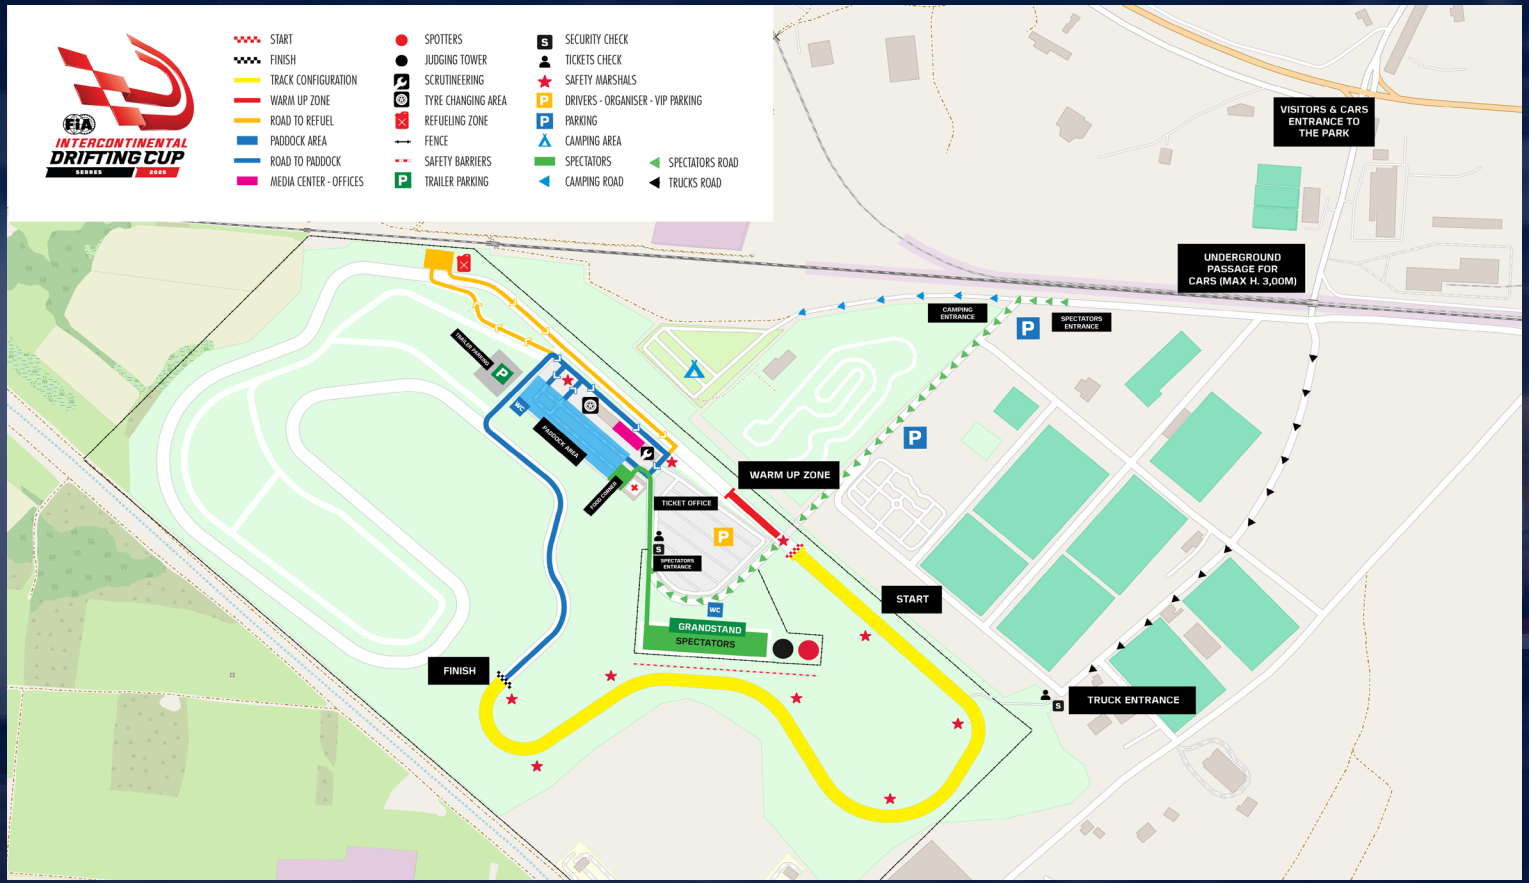

DRIVERS MUST STAY ALERT AND BE READY TO START.

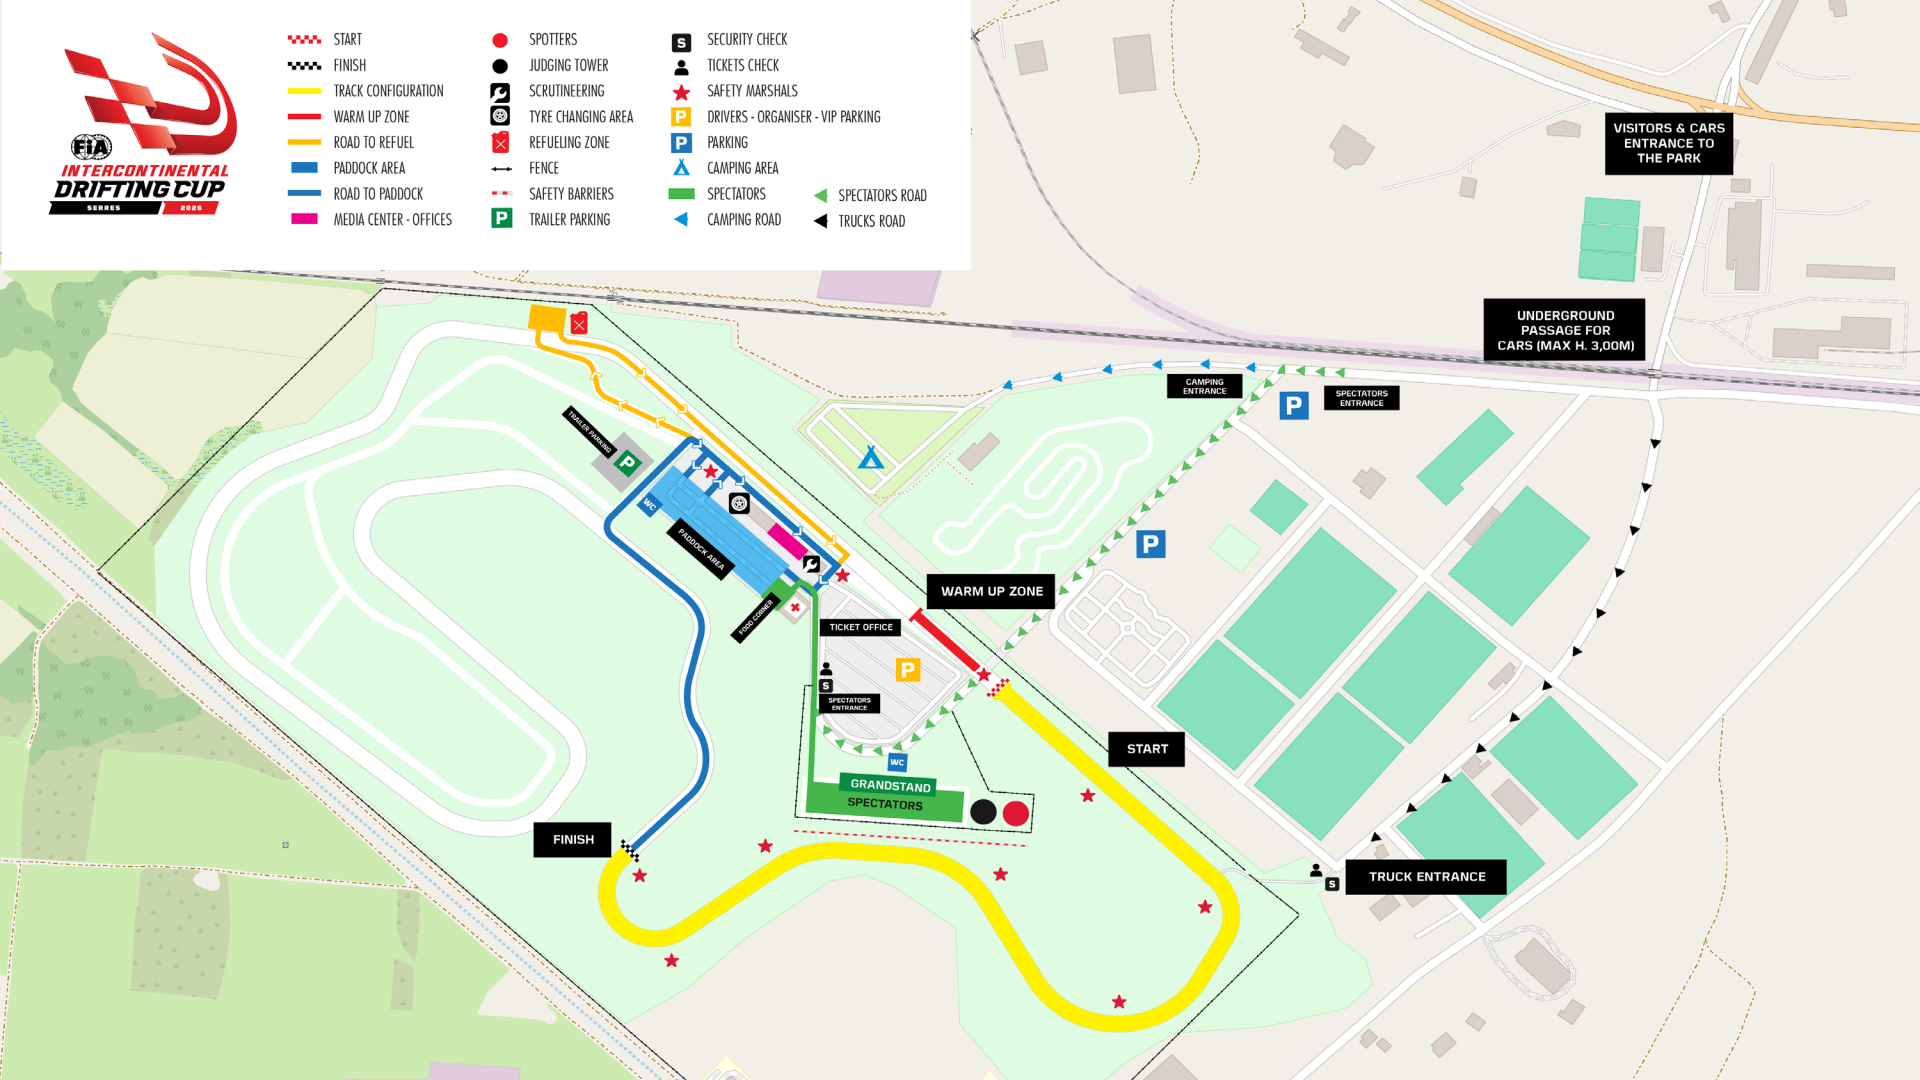

3 THE START MARSHAL DROPS THE GREEN FLAG THE START IS GIVEN

ONCE THE FLAG BEGINS TO MOVE DOWNWARD, THE RUN STARTS.
