Logger availability:

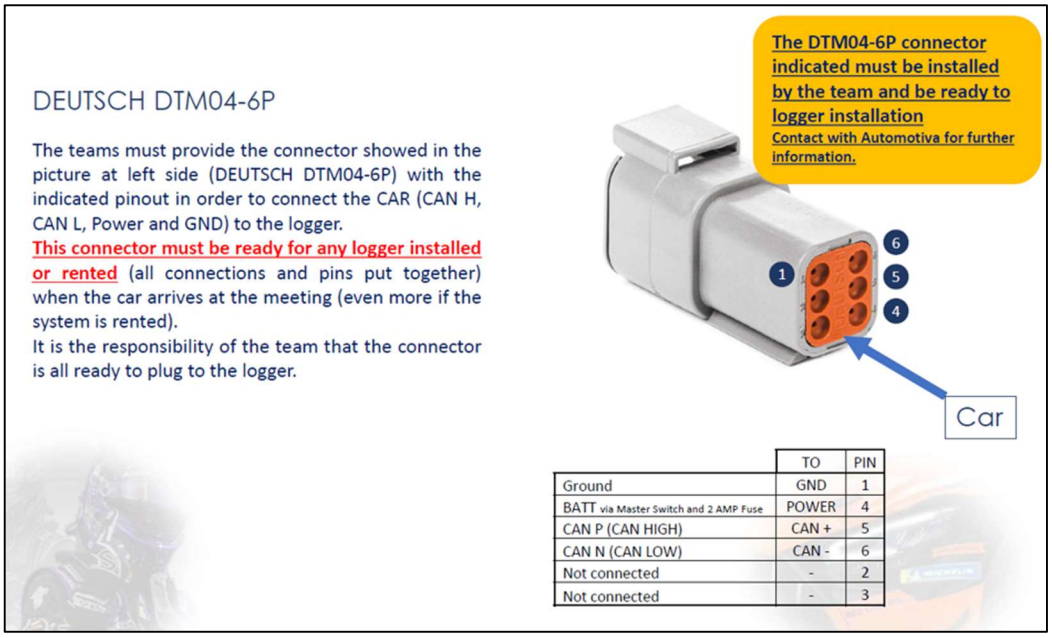

Loggers are owned by UCS. Its use and pricing are under the responsibility of UCS. Teams are currently offered the possibility of renting the kit for a meeting for 395€, and for the entire season for 1330€.

A logger kit consists of:

- The logger itself
- A base for installation in the car
- A wiring with the different connectors necessary for the correct operation
- A GPS antenna
- An SD card
- An external pressure sensor (for those vehicles with a turbo engine)

Connector compatibility:

Each team concerned by the logger obligation must make sure they provide access to their CAN data via a 6 pin DTM connector as follow:

Logistics:

- Loggers will be delivered at each event lates on Thursday evening before the race weekend.
- Logger will be taken back after each meeting (even for team renting it for the full season).
- Free practice sessions and private testing will be used to set-up the systems and check that everything is working properly.
- Official data checks will occur in Qualify and Races.
