Road Book

This book contains all the information required to successfully complete Day 2 of the 2026 Eco Rally Scotland. The following notes provide general information about the running of the event and supplement the information contained in the supplementary regulations and final instructions.

The route is largely given in the form of tulip diagrams. The Regularity Sections are also defined by an extract from an Ordnance Survey map showing the route.

For those who have never used a tulip route book before, here are the fundamentals:-

The first columns give the Total distance from the start of that section and the Interval distance between each instruction. These distances are given in kilometres. The tulip diagrams are a symbolic illustration of a location or road junction and you should travel from the ball to the arrow at each location. Not every junction or feature is included, so stay on the major road or track unless the instructions dictate otherwise.

It is strongly recommended that you have an accurately calibrated tripmeter (eg Monit) fitted to the car so that you can precisely locate each junction or instruction from the distances given in the road book.

Details of a Tripmeter Check Route has been issued separately. You should drive this route to check the calibration and operation of your tripmeter.

Speed limits
Please respect the speed limits at all times particularly in the villages through which the route passes.

Single track roads
Many of the roads in Scotland (including some main roads) are single track, i.e. they are only wide enough for one car at a time. There are normally regular “Passing Places” on these roads that are identified by a white sign. The correct procedures when encountering another car on these roads are:

When the other vehicle is coming towards you: stop at the final Passing Place before meeting the other vehicle and wait for them to pass.

When the other vehicle is behind you: pull into the earliest possible Passing Place and stop whilst the car behind comes past.

Retirements
Any crew retiring from the rally must report such retirement to the organisers as soon as possible.

INCIDENT PROCEDURE

In the event of being First on Scene at an incident:

If anybody is still in the vehicle and the vehicle is on fire and IF IT IS SAFE TO DO SO; GET THEM OUT IMMEDIATELY.

If anybody is still in the vehicle, is responsive, and there is no risk of fire:

- Approach from the front, look them in the eyes
- Do they seem aware of their surroundings?
- Speak to them, ask their name - do they respond?
- Any pain, loss of feeling - if yes keep them where they are!
- Keep them calm and keep them talking.
- DO NOT MOVE THEM UNTIL PROFESSIONAL HELP ARRIVES.
- Do nothing else

If anybody is still in the vehicle, is unresponsive and there is no risk of fire:

- Stop any life threatening bleeding by applying direct pressure/ plugging the wound
- Ensure an open airway
- Immobilise the head and c-spine (neck)
- Check if they are breathing
- Treat any non-life threatening bleeding

If a casualty is out of the vehicle:

- Do not grab hold of them - they might be unaware of what is happening and become combative.
- Guide them to a place of safety away from the incident and other traffic.
- Speak to them, ask if they are OK?
- Keep someone with them.
- Once in a safe place, assess them for injuries:
- Are they aware of their surroundings?
- Any signs of injury / are they experiencing pain?
- DO NOT LET THEM WANDER AROUND, BUT KEEP THEM UNDER OBSERVATION

Afterwards please write a short report for the organisers and hand it to the Clerk of the Course. This report should cover the facts as you know them and include time of the incident and when you left the scene; always include your own details so that the organisers can, if necessary, contact you.
