1 Route book Printing Error

Due to a printing error all of the black rectangles on the stage portions of the Day 2 route book are choosing to identify as danger dots. All danger dot mileages are to the actual danger not the location of the stake. Day 1 route book was correctly printed.

2 Stage Staking

During pre-recce setup all danger dots are marked with stakes and small danger dot signs on them. Danger dot stakes are placed before the danger to improve sight lines. The stake locations are not marked in OnX, KMZ, nor the route book.

The setup teams have staked the stages in accordance with RCR 1.3.1 as opposed to Supplementary Regulations 15.8.1; therefore, all double and triple cautions in the route book have been staked with double crossed arrows and triple crossed arrows respectively.
