

TRACKY APP ALARM FUNCTIONS

The Tracky app will also be used as an additional tracker alongside the main tracking device. With the option of using the OK & SOS on the bottom of the screen.

Once you have pressed the OK button for the allotted time you will then be given a choice of reasons, which is additional information for us in rally control. Your OK request is sent regardless.

Once you have pressed the SOS button for the allotted time you will then be given a choice of reasons which is additional information for us in rally control. Your SOS request is sent regardless.
