Bulletin NLR26/0.03 - Grid Composition Changes (From Round 2)

ALL Fortis F900R Cup and Next-Gen Sportbike

Following consultation with a number of riders, we're making a change to the grid composition for the Fortis F900R Cup and the Next-Gen Sportbike classes.

What's changing

From Round 2 onwards:

- Fortis F900R Cup will run on the same grid as the NL Club Sport Cup and the NL Streetbike Cup.
- Next-Gen Sportbike will run on the same grid as the SORN Cover Stock Twin Trophy and the Trackday Addicts SuperTwin Trophy.

Why we're making this change

Based on the characteristics and performance of the machines, the classes above are better suited to these alternative grids. After speaking with a number of riders, this is the best option available to us to ensure the safest and most competitive racing.

Monitoring and review

The new grid compositions will be closely monitored at the next round. As always, we'll review how it works in practice and make further adjustments if needed.

Donington entries

Any rider who has already entered Donington will be contacted by email to confirm:

- Their entry details
- Their race number(s)

Thanks for your understanding and continued support.

END
