Bulletin NLR26/1.01 - Amended

ALL Endurance Teams

Qualifying Tyre Control & Parc Ferme

Qualifying Tyre Control will take place in the pit lane throughout the endurance qualifying session.

Parc Ferme will take place in the pit lane. This will require riders and teams to line all machines up from each team in the pit lane along the hatched area between the Slow Lane and the Fast Lane of the pit lane. Teams must then leave their machines and may remain in the garages or garage apron. For the avoidance of doubt, the garage apron is the concrete area immediately in front of the garages.

Checks will be performed by technical control and this will last up to 30 minutes. Following the checks, you will be permitted to return to your machines for photographs, etc. This is to allow compliance checks to be carried out and ensure fairness.
