

ROUND 1 2026 MOTORSPORT AUSTRALIA, WESTERN AUSTRALIAN OFF-ROAD CHAMPIONSHIP
Permit Number 626/0103/01

Drivers Brief #3 – Briefing Notes

1. **Start/Finish Line**
   As today is 2 laps for each section of racing, the loop that is 100m prior to the start line is no longer in use. You will start and finish under the same loop which is at the start line. Once you have finished your 2nd lap, you will follow the race track, turn right around the load ramp and then peel off to the right to re-enter the pits. If you need to enter the pits at the end of lap 1, please use the same pit in as yesterday
2. **Impound**
   At the end of Section 3, vehicles will be held in an impound. Vehicles may be inspected. Once the last car has finished, as soon as reasonably practical we will hold a small presentation for the top 3 outright provisionally
3. **Rallysafe and Transponder Return**
   In order to receive your logbook back, you must return your transponder and RallySafe unit.
4. **Demarking**
   Competitors are requested where possible to assist with demarking at the end of the event. Please see Nicholas Van Geest or Daniel Smith if you can help out.
5. **Bitumen Road**
   Just after the start we turn onto the bitumen road called Crossing Road, you head east and at the caravan park we turn left onto North Road. Some competitors are using last years track where they jump off to the right side of the verge. You don't need to do this, stay on the bitumen until you turn left back onto the dirt. We have added some cones to make it clearer where not to go
6. **SOS Channel**
   UHF 14. Local firies were using Channel 12 yesterday.
