

Clarification of Class Eligibility – ESHR Support class 2026-06-03

To avoid any misunderstandings, the organiser would like to clarify that all cars conforming to the regulations of the respective category are eligible to enter one of the four App K classes, regardless of whether the car is registered in Sweden or abroad.

The two classes designated as “Open class” are intended exclusively for foreign-registered cars competing with non-Swedish registration and technical documents. These classes have been established to allow foreign competitors to participate using documentation issued in accordance with the regulations of their home country.

Cars with Swedish registration and/or Swedish technical documents (national or international HTP) must be entered in the appropriate App K class according to the car's specification and period.

In summary:

- The App K classes are open to both Swedish and foreign cars competing under the App K regulations.
- The Open classes are open only to foreign-registered cars competing with non-Swedish registration and technical documents.
