1ST MARCH 2026

RESEED REQUEST FORM

A software program has been used to assist with the Mayo Stages rally seeding. This software compares a driver's individual stage times against the fastest car on that same stage. An average is taken over the competitors' most recent events to generate their 'speed rating'.

Finishing results are not considered in this rating, only the best individual stage times. The software will automatically filter out abnormally poor stage ratings for every driver, to account for a poor stage time due to a spin, puncture, mechanical issue, etc.

Please bear in mind the size and quality of this rally entry when thinking about requesting a reseed. While it may be true that your speed is quite comparable to a car seeded 20 places ahead, the reality is that your most recent average stage ratings have been less (probably by a very small margin in many cases) than the cars seeded in front of you.

If you firmly believe that your seeded position will lead to you catching cars ahead on a stage, please answer the questions below so we can investigate why your position may be incorrect:

Car No.

Have you upgraded your car or class?.....

Reasons why you believe your seeding is incorrect

Expected Seeded Position.....

Please supply 2 recent events which you would like us to review your ratings on (result is not important):
