

WORLD RALLYCROSS CHAMPIONSHIP MONTALEGRE INTERNATIONAL CIRCUIT

ENVIRONMENTAL POLICY

For an event to last over time, in the name of an ongoing and growing commitment, it is fundamental that it be sustainable. Although we have already demonstrated, in previous editions of the event, our concern with various factors related to the protection of the environment, such as: the correct management of waste, water and energy consumption, the protection of soil and water from possible contamination, air quality and noise reduction, the Municipality of Montalegre, is aware that it can do more and better to reduce the carbon footprint left by the only race held in Portugal of the FIA World Rallycross Championship, thus, we intend to continue to increase practices that minimize the environmental impact in order to be able to establish principles for the sustainable development of motorsport and that its use results in a contribution to the awareness of environmental problems.

In a conscious manner the organizers of the FIA World Rallycross Championship of Portugal, intend to join forces to put the following objectives into practice:

- To respect all environmental laws and regulations;
- Promote and disclose our environmental policy to all the agents involved in the race (organization, teams, riders, partners, sponsors and spectators);
- Prefer the use of renewable energies, whenever possible;
- Promote the efficient use of water;
- Use non-potable water, preferably with reuse of residual water, in cases where it is not for human consumption (watering the circuit during races);
- Take into account the environmental concerns of suppliers in their selection;
- Prioritize services and products with good environmental performance;
- Give preference to spectators travelling to the event in electric cars;
- Use the municipality's electric cars to transport the organization's members during the event;
- Always take into account the importance of selective waste collection, promoting good practices among all the elements involved in the event (organization, teams, drivers, partners, sponsors and spectators);

- Plan and structure the tasks in order to improve our performance in environmental responsibilities;
- Encourage the use of reusable products in order to minimize the impact of the use of disposable plastic material;
- Reduce the use of paper documents, promoting and encouraging the use of digital format.

The Mayor of Montalegre

(Maria de Fátima Pereira Fernandes Alves)

HELP US TO REDUCE THE ENVIRONMENTAL FOOTPRINT OF THE EVENT

Uma Ideia
da Natureza!

Evite o plástico
Avoid plastics

Evite a produção de resíduos
Avoid the production of waste

Separe todos os resíduos
Separate all the waste

Poupe água
Save water
