

Fuel Bulletin 1

Euro M-Sport are proud to continue as the official control fuel supplier of the Irish Tarmac Rally Championship. Please read the below bulletin to learn what fuel is available for your rally car and how refuelling works.

The below fuels will be available at the refuel zone to be pumped into your car:

PANTA ITC 102
PANTA RALLY 98
PANTA MAX 102

All International competitors must use either Panta ITC 102 or Panta Rally 98. If you need help sourcing the correct Panta map for your car, please contact us and we will advise you in selecting the correct one.

All National, Historic and Junior competitors have the option of using any of our fuels. For example, any competitor who currently uses Panta Max can now get their fuel pumped directly into their car instead of hauling drums to the refuel zone.

All fuel orders must be prepaid by BACS or preauthorised on a credit/debit card prior to each event.
