

## OFFICIAL STATEMENT

### Wastewater Management & Paddock Protocol

Dear Teams and Riders,

As part of our ongoing commitment to a more sustainable EnduroGP, we would like to remind all participants of the mandatory wastewater management procedures for this event:

- **IBC Containers Provided:** The local organizer has placed a large number of IBC containers throughout the paddock specifically for the collection of wastewater (grey water) from trucks, kitchens, and cleaning areas.
- **Transfer Pumps Required:** Please note that each team is responsible for providing its own water pump to transfer wastewater from their vehicles or kitchens into the designated IBC containers.
- **Zero Discharge Policy:** It is strictly prohibited to pour or drain any type of wastewater directly onto the ground. Protecting the soil and local water sources is a priority for our sport's future.

#### Special Requests:

If your team has any specific needs or technical requirements regarding water disposal, please do not hesitate to contact the Championship Promoter directly for assistance.

We thank you in advance for your full cooperation in making this event an environmental success. Let's work together for a cleaner and more sustainable

Thank you.

The sustainability team
