

## ATTENTION ALL TEAMS

## PROTECTION OF THE GROUND AND BIODIVERSITY

Dear Teams,

We are located in a fabulous spot, in the Swedish town of Skövde — a place nestled in the heart of nature and surrounded by lush vegetation. In order to continue enjoying enduro riding in such beautiful surroundings, it's essential to practice sustainable motorcycling, which means avoiding actions that could harm the environment.

We would like to remind everyone that the FMCK Skövde Moto Club has installed several IBC/GRG tanks for collecting wastewater in the paddock. We kindly ask all teams to make use of them. If any team needs further information, please contact the organizer's office.

This is the correct procedure for using them.

## FIM Environmental Code

*Article 4.d) It is strictly forbidden to empty on to the ground waste liquids from vehicles and catering facilities located in the riders' paddock and the campsite. Waste liquids may only be disposed of at the circuit if the organiser has provided a proper facility to allow this. Any infraction to this rule will be reported to the International Jury.*
