

## OFFICIAL STATEMENT

### Attention: Teams and Riders

To prevent the spread of harmful invasive species between different regions and countries, we kindly ask all teams and competitors to ensure that motorcycles, equipment, and riding gear are thoroughly cleaned and washed after each use.

Special attention must be paid to removing any soil, mud, organic material, and debris that could be transported from one location to another.

This measure is important for protecting local ecosystems and biodiversity, as well as supporting environmental sustainability at all event venues.

We appreciate your full cooperation and commitment to this important matter. It is extremely important that cleaning is carried out in the designated washing areas.

The motorcycle wash area is located indoors within the venue and is marked on the area map. Riding gear may also be washed there.

Thank you.

The sustainability team
