

## Rixy Stages 2023

### Competitors' Final Instructions

1. **Service area.** A reminder that the service area will be on grass. A groundsheet or similar is mandatory to prevent contamination in case oil, fuel or other substances are spilt. Spill kits must be used if this does occur.
2. **Lighting.** We are timing the rally to make best use of the limited daylight at this time of year. However it will be dark as you arrive and leave, and there are sections of the stages that are under trees.

There is no lighting in the service area so please consider bringing torches, head-torches or similar for the beginning and end of the day. If you wish to use auxiliary lights on the car then these must be fitted for scrutineering.

3. **Fuel.** A reminder that there is no fuel available at the venue and it will not be possible to leave during the event to refuel. Please arrive with enough fuel for the day. A list of nearby service stations is in the SRs.

Refuelling must be by pump only not pouring. There must be a fire extinguisher to hand and visible, and there must be no-one in the car. This extinguisher must be presented at scrutineering.

4. **Friday scrutineering.** This is at Thetford International not High Lodge, see earlier Competitor Bulletin for details and times.

Wishing you a Happy Christmas and see you at the Rixy Stages
