

2026 SOFR Radio Plan

Use Primary Repeater (All repeaters are same frequency)

Any issues that cannot be fixed over the net – call Jeremiah 740-703-4251 or JB Lewis 612-210-0023 and they will coordinate repairs.

There are 3 repeaters and 2 duplexers at the fire tower to swap through

If all repeaters fail, we will use one of these 2 plans:

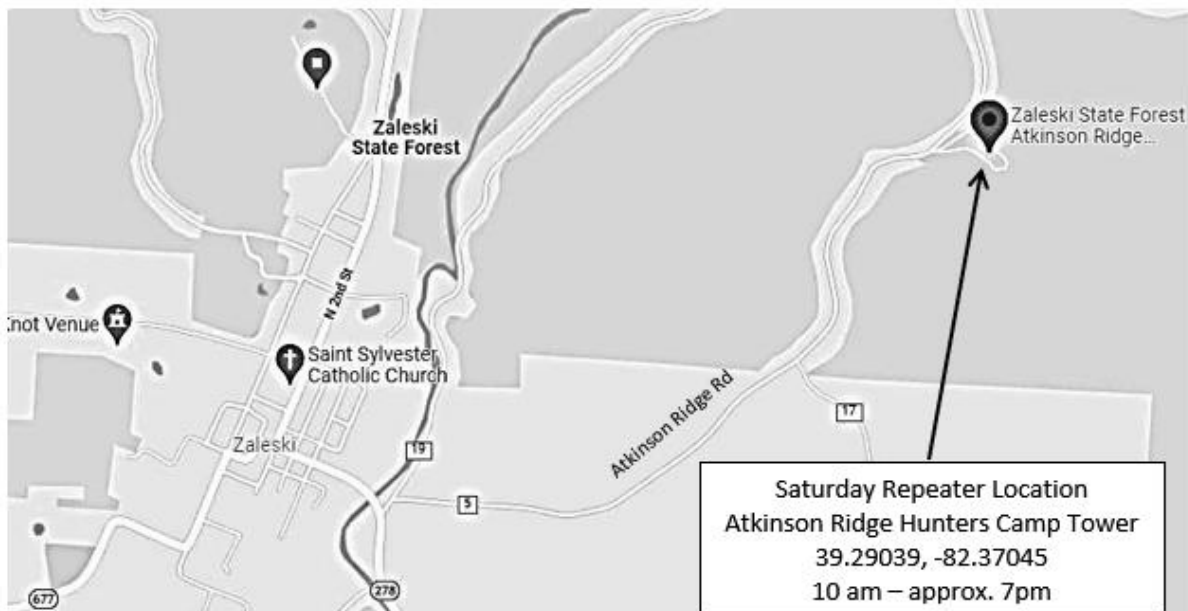

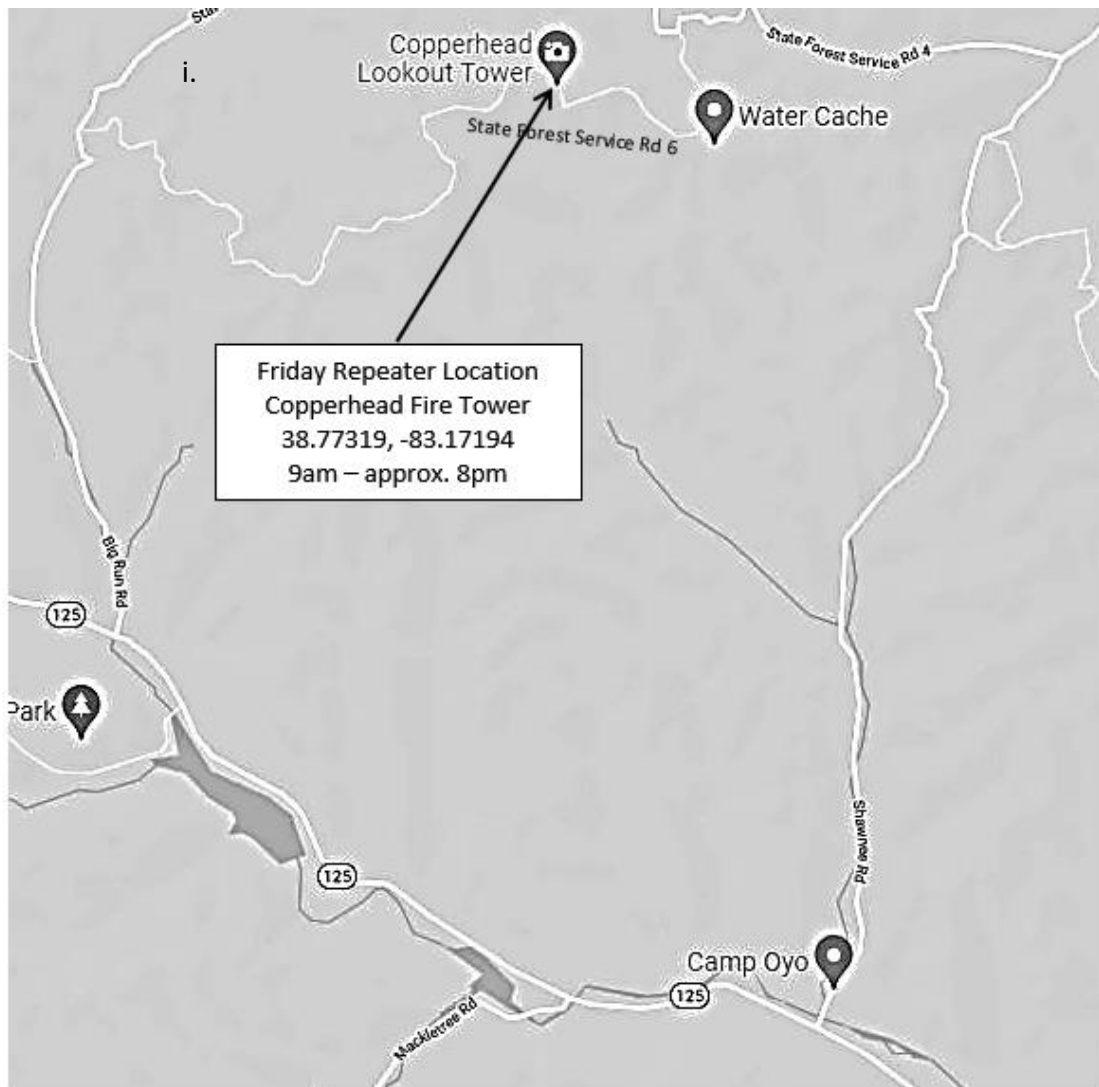

- 1) Ohio Emergency Network handheld radios will be distributed to all locations by Course cars and Chief of Controls. Everyone stays in assigned locations.
- 2) Simplex Ham Relay Network:

Shawnee (Friday)

- Repeater antenna is used with an 85-watt simplex radio with adaptor
- Net Control and CoC move to location C (Has cell coverage)
- Chairman moves to location A (Fire tower)
- 000A and 00B (or assigned extra radio personnel) move to locations D & E to become relay stations
- Service Radio and assistant CoC (B) stays at service and relays with Rally Safe

Zaleski (Saturday)

- Repeater antenna is used with an 85-watt simplex radio with adaptor
- All radio locations can hit fire tower on Simplex
- Net Control and CoC move to fire tower. (Has cell coverage)
- Assistant CoC and Service Radio stays at Service
