Safety Sweep (No Jumps) SS2	~21:17~	21:18		
Heavy Sweep & Green Light SS2	~21:18~	21:19		

~approximately

- All the above cars (not all competition cars) must be called into net control when they enter and finish the stage.
- I'd also like to make sure we create a full visual of the course with radio personnel for added safety.
- Make sure the start radio is in a position to stop cars starting immediately. 30 second gaps will come up quickly.
- All Emergency vehicles must be cleared by Net Control before entering stage.
- Practice RallySafe timing on advance and zero cars!
- There is no ATC for either run, wave cars into the start line and keep them lined up. Just write in the start time on the timecard.
