RallySafe Tracker

Please note that the RallySafe tracker must be connected to permanent power (12V) during the ENTIRE event, i.e. on road sections, special stages, service breaks, regrouping and parc fermé.

If you are not sure that the car's battery can handle the consumption, you must bring additional power.

RallySafe Tracker

Vær opmærksom på, at RallySafe trackeren skal være tilsluttet permanent strøm (12V) under HELE arrangementet, d.v.s. på transport etaper, hastighedsprøver, servicepauser, regrouping og parc fermé.

Såfremt I ikke er sikker på, at bilens batteri kan klare forbruget, skal I medbringe suppleringsstrøm.

Unit Power Consumption at 12 Volts	
Power on Transit Mode	.200A
Power on Transit Mode - Charging	.300A
Power Down – Sleep Mode	.002A
Transmitting Incident on Stage	.250A
