

RSLite Competitor Manual

STATUS AWARENESS SYSTEMS
14 Short Street, Ulverstone, 7315 Tasmania, Australia

RSLite® from RallySafe®.

While RallySafe Lite has been developed with the best intentions, we are not liable for individual phone performance, quality, or battery life. We recommend that competitors should carry a portable phone battery supply or have a charging cable fitted in the rally car.

An estimated 50MB of data is required for a 1-day event.

Competitor User Guide

The free app is available from the Google Play and Apple App stores.

Competitors are responsible for having a device capable of using the app with GPS tracking, connection to the available GSM network, and a battery capable of lasting for the entirety of the competition.

Considerations should be made to ensure the phone or tablet can be charged during the event and that there are no 3rd party applications enabled that may disable GPS tracking.

Apple App Store

Phone Settings

The RSLite® mobile application required access your location for the use of transmitting your location to Race control using your mobile device

Ensure the application is correctly installed and updated prior to attending an event.

Ensure that the app is always running and in tracking mode during the event.

While RSLite the app should automatically prompt you to change the required settings, if you find that your mobile device is not in tracking mode, follow these steps.

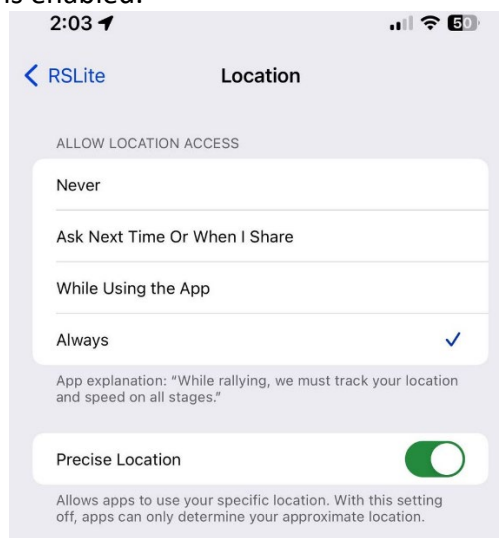

IOS Devices

The following settings must be set correctly in the Settings app (Settings/RSLite®)

- Location: Always
- Background App Refresh: Enabled
- Mobile Data: Enabled

Another check – Select Location (on the RSLite settings page), make sure location services is set to always, and ensure that Precise Location is enabled.

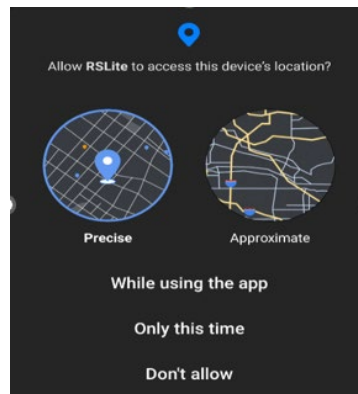

Android Devices

The following settings must be correctly set on your Android device.

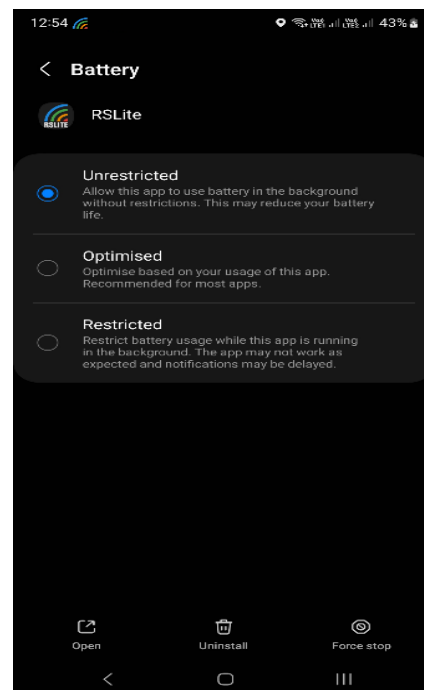

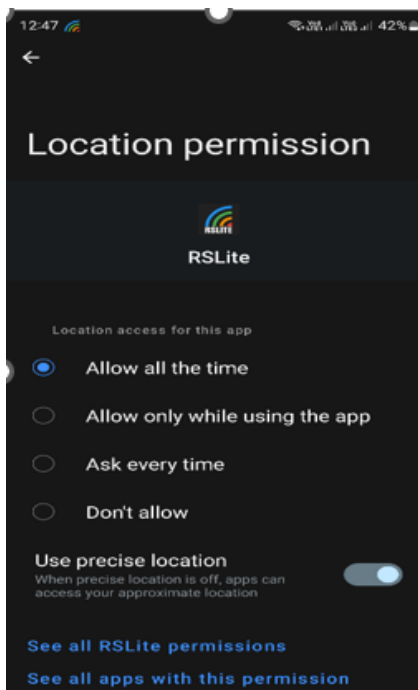

When first opening the application on an android device, the following screen should appear.

Please select “While using the app”

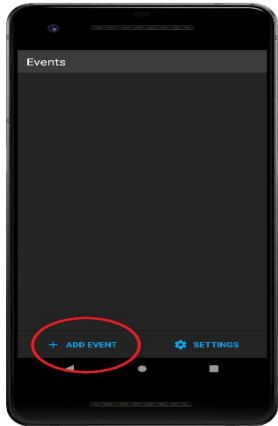

Shortly after making this selection, the following screen should display. Select “Allow all the time” for the tracking to be set up correctly.

Ensure the battery settings are set to “Unrestricted”. The app should prompt this if it is not already set correctly.

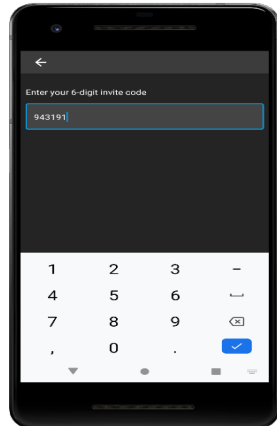

Competition

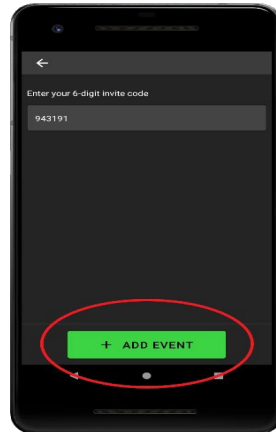

Upon arrival and checking in at the event, each competitor will be provided with a unique code to access the RSLite® app.

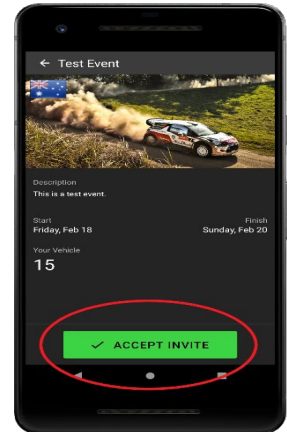

Main Screen when app is opened. Click "+ ADD EVENT".

Enter 6-digit code

Click "+ ADD EVENT".

Click "ACCEPT INVITE".

The Event will now be displayed in the events list. Select the event.

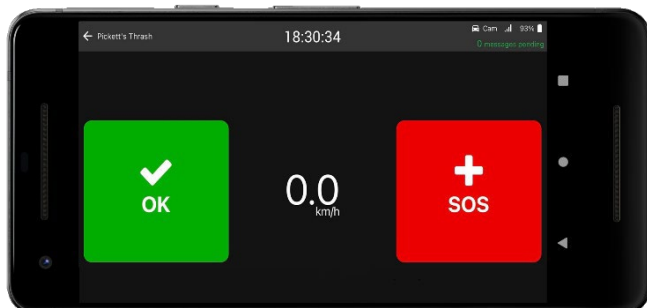

Click start tracking when beginning the event.

Main Screen when tracking.

When logged into the event with your code, the main screen will display your current speed.

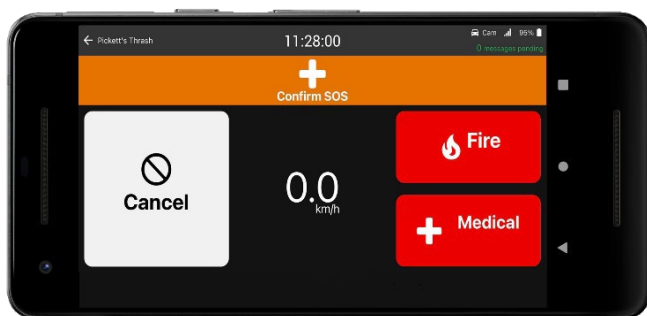

If you stop at any point within a competition section, the Figure 1 screen will be displayed. You can select to update your status as OK or SOS. Please only select SOS if you require either Fire or Medical services. You will be asked to confirm which SOS service you require.

(Fig. 1) Stopped within Competition section.

(Fig. 2) OK selected + OK sent.

(Fig. 3) SOS selected. Confirming the SOS.

Fig. 4) SOS Medical confirmed + SOS Medical sent.

Note – above the OK or Fire/Medical Banners, there is a Sent “Status”, this is a confirmation that the message has got to Race Control (Fig. 2 + Fig. 4). If you are not connected to the network the message will not get to Race Control.

This system is not intended to replace any other safety protocols in place at the event.

The primary safety protocols at an event are ALWAYS as instructed by the event or national sporting regulations.

The application must be running at all times of the competition.

While the screen must be in the foreground during any competition stages, the app can be put to the background while in transport/liaison sections. Ensure that while doing this you have background apps enabled

and that you do not forcibly shut the application.

If the app is intentionally disabled on stage, a report is generated in the RallySafe® web application, which may result in action being taken by Race Control.

Competitors must ensure the app is active during competition. If the app doesn't report for an extended time period during the competition, an alert is sent to the RallySafe® web application.
