

Competitor Bulletin 1 – October 29, 2022

### **1.1 RallySafe Check-in**

Please use the electronic check-in button in addition to a manual check in at all arrival controls where we are checking you in. This includes the Service control.

Due to an equipment shipping error, we may not have tablets for the service in and out controls. It is imperative that you use the TC Check In button that will show on your RallySafe unit AND drive across the cattle guard in or out during your control minute.

### **1.2 Turn-around stages**

Please note that there will be no arrival time check-in for the Prairie Creek North Stages (4 & 6). The transit time is an advisory time and you may get called in early to the control if the stage is ready to start.

### **1.3 Virtual Chicanes**

There are two virtual chicanes in use at this year's event. One on the Loop stage and one on Prairie Creek North. Chicane penalties are as indicated in the CARS rule book.
