Driving Standards

We would like to remind competitors about general driving standards and adherence to national speed limits along the public highway.

Please observe the highways road traffic speed limits as you drive along the main highways both to and from Llandudno and the Service Area in Ruthin.

Events Stewards and Driving Standards Observers (Judges of Fact) will be located along the route and will be reporting any deviations in acceptable driving standards.

We would also like to remind you of the changes in default speed limit in Wales that came into force in September 2023

The revised default limit on restricted roads is now 20mph.

These are roads in built-up areas, particularly where there is high pedestrian activity, and was previously set at 30mph.

The RAC has warned drivers not to rely on satnavs for the correct speed limit and to instead follow the road signs.

The average speeds published in the event road book have been calculated in accordance with the revised speed limits.

Thank you for your assistance in this matter

Wenna Roberts
Clerk of the Course

A handwritten signature in black ink that reads 'W Roberts'.
